THIS IS OUR ONLY SALESMAN

In presenting this edition of our catalog we wish to extend thanks for past patronage and to assure our customers prompt and careful attention to all inquiries and orders they may favor us with.

THE CASH WITH ORDER WA

SAVES YOU 50c ON EVERY DOLLAR

Why Pay Agents Commissions.

Why Pay Other People's Bad Debts.

You get trees so much cheaper from us because THE CASH WITH ORDER WAY saves 50 per cent and gives YOU the benefit.

- HOW TO ORDER.—Please make out your order on detachable order sheet in back of catalog. Send payment with order. Procure a Money Order at your postoffice or express Mail all to us in office, or a draft at the nearest bank or send cash in a registered letter. the enclosed self addressed envelope. Foilow directions "HOW TO ORDER" on order sheet as closely as possible and make directions very plain as this will prevent any mistakes occurring. If directions are omitted we will forward according to our own judgment. Small orders will go cheaper by express, large orders by freight. Always state sizes desired.
- ORDER EARLY, as our orders are shipped in the rotation they are received—First come first served. We cannot delay orders received first for orders coming later requiring immediate attention. If for any special reason it is necessary that an order be shipped on a specified date make a note on the order and we will comply with the request if possible. Our regular shipping season opens in the Spring about March 15th and in the Fall about October 1st.
- PACKING.—We do not charge for packing, boxing or delivering to freight or express companies at Rochester. We do not prepay any charges, unless goods are to be delivered to a prepaid station, as all our prices and quotations are **Free On Board cars at our nurseries**. If you have no agent at your station and shipment has to be prepaid notify us and we will prepay and bill charges to you after shipment.
- OUR TREES are Clean, Healthy, Hardy, and Thrifty. Finest grown. It is an established fact that in no other part of the country do fruit trees attain the perfection of those grown in Rochester and vicinity. Not one nurseryman in a thousand buds or grafts his own trees as we do. Our trees are grown and cared for by men who have been in our employ from 25 to 30 years. They know how and do turn out the finest fruit trees possible.

Our stock is all first class of the different sizes as specified. We do not handle any second class trees. All poor trees or culls go into the brush heap.

There never has been any San Jose Scale found in or near our nurseries. Our trees are inspected by state authorities every year and an official certificate of their freedom from diseases accompanies each shipment.

- OUR GUARANTEE.—We guarantee our stock TRUE TO NAME. While we exercise the greatest care to have our stock genuine and reliable, we agree to replace, on proper proof, all that may prove untrue to name as labeled, and it is hereby mutually agreed that our replacing it or offer to replace shall operate as a liquidation of all damages.
- OUR RESPONSIBILITY.—See any commercial agency, banker or postmaster at Rochester, Our trees are sold by pleased customers recommending us to their friends. We cannot afford to give unsatisfactory service to our patrons. IF WE PLEASE YOU TELL YOUR FRIENDS. IF NOT TELL US.
- RATES—We allow ten rates on lots of five or more of the same variety and hundred rates on lots of 50 or more of the same kind, provided that the lot is composed of not less than 10 of any one variety. Lots composed of less than 10 of a variety will be charged at ten rates and lots less than 5 of a variety at single rates. You will note that our hundred rates are not figured at a discount from our fifty rates. The fifty rates are given simply as an aid to our patrons in making out their orders.

Different kinds such as 30 apples and 20 plums cannot be taken together so as to get hundred rates. The lot must be of one kind as 50 apples or 50 plums.

COLLECTIONS-We cannot make any changes in our collections for they are selected and bundled before our busy shipping season and the valuable time saved by doing this makes it possible for us to offer these collections at such a reduced price.

A GOOD REPUTATION

This is what Charles A, Green has been working for the past twenty-eight years. When he started this business he found difficulty in selling his trees but as soon as people found that his trees were TRUE, TO NAME he could hardly grow enough to supply the demand. We are compelled each year to increase our capacity, our force of laborers and packers to keep pace with our increasing business. "We have heard from our friends that you are reliable and a firm dealing fair and we want your trees" write many people. "We want your trees, plants and vines because they prove TRUE, TO NAME when fruiting."

WHAT A BANKER SAYS ABOUT US

CAPITAL AND SURPLUS \$1,000,000

The Traders National Bank Rochester, N. U.

November 19, 1907.

To whom it may concern:

To whom it may concern:

I take great pleasure in saying that I consider Green's Nursery Company entirely reliable, a house of many years' standing, and with undoubted business integrity and honesty.

I believe any merchandise purchased from them will be found strictly according to contract, and true to name. We have known the officers for many years past, and our business relations have been entirely satisfactory. The company has ample capital for the business done, and we take pleasure in most heartily recommending them to anyone desiring to purchase trees, shrubbery or other nursery stock.

Wey truly yours,

HENRY C. BREWSTER, President.

A MISTAKEN IDEA. Some prospective

CHAS. A. GREEN recommends the following list of apples for planting in differ-ent States named below. Other varieties succeed there, but those named are the leaders:

For New England, New York, Pennsylvania, New Jersey, Indiana and Michigan.

American Blush Banana, Bismarck, Baldwin, Ben Davis. Dutchess. Fanny, Fameuse, Grimes Golden, Gravenstein,

Jonathan, King, Lord Nelson, Northern Spy, Red Astrachan, R. I. Greening, Sutton Beauty, Wagener, Wealthy.

For Illinois, Wisconsin, Missouri, Kansas, Minnesota, Iowa and Nebraska, all hardy:

American Blush, Ben Davis, Dutchess, Fameuse, Hubbardston, Jonathan, Maiden's Blush, McIntosh,

N. W. Greening, Rome Beauty, Shiawassee Beauty, Stark, Willow Twig, Yellow Transparent, York Imperial.

For Delaware, Maryland, Virginia, West Virginia, Kentucky and Tennessee.

Ben Davis, Northern Spy, Stark, Wealthy, Yellow Transparent, Dutchess, Gravenstein, York Imperial. Jonathan,

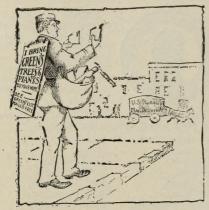

For North and South Dakota, Wyoming and Montana, all hardy:

Dutchess. Pewaukee, Wealthy. Fameuse, Yellow Transparent. N. W. Greening,

buyers of trees have an idea that nothing but the largest size trees are fit to plant, that all other sizes are poor trees. This is a mistake, as some of the best orchards are grown from the smaller size trees. Small trees are not thirdclass, but first-class of their size, and while we do not recommend the small planter, or one who plants a few trees, to select the small size for his planting, we do recommend the medium and small sizes to the orchardist. We have an especially nice lot of peaches and quinces in the smaller sizes, and a fair number of apples, pears, cherries and plums at prices quoted.

C. A. GREEN'S PLAN FOR LAYING OUT A TEN-ACRE FRUIT FARM

MAIL CARRIER DELIVERING PARCELS OF PLANTS, VINES AND TREES FROM GREEN'S FRUIT FARM

For mail orders see pages 64, 65 and 66.

GREEN'S DWARF PEAR TREES—I advice you to plant dwarf pear trees in your gardens and in your village or city lots. These trees occupy but little space. I plant dwarf pear trees three feet apart in a row through my kitchen garden. There is room for fifty or one hundred trees thus planted in a row. I cut back the new growth severely each year. These trees begin to bear fruit at once. The row of trees are an ornament to the place and attract much attention. I planted in this row many of the leading kinds of pears. I have picked nearly a bushel of pears from a single dwarf tree thus planted.

VARIETIES OF DWARF PEARS—We have a large supply of dwarf Bartlet, Seckel, Duchess and Kieffer pear trees. We have other varieties of dwarf pears such as Gans, Wilder Early, Clapp's Favorite, Duchess, Lawrence, Worden Seckel and Flemish Beauty which ripen in the order named. We sell these dwarf pear trees at lower prices than we get for the standard pear trees. Green's prices for carefully graded dwarf pear trees are found on page 18 in this catalogue.

GREEN'S NORTH GROWN TREES—What would Peary have given for an apple at the North Pole? One reason why Rochester, N. Y. trees are wanted all over the country is that they are grown at the north and are hardy in wood and bud. These north grown trees will thrive over a wide extent of country. 60 years test has proved this. The soil and climate at Rochester is adapted to the production of early bearing, long lived trees. This locality is noted as being exempt from scale.

PROFIT IN PEARS—While Mr. Pettit's chief output is in grapes, he has plantations in pears, plums, etc. From one Anjou pear tree last year he picked 56 baskets of fruit, which netted \$27. Bartlett pears from New York state have been selling in Cincinnati market at \$6 per barrel.

Gentlemen:—It is with pleasure I write to inform you that out of the 62 trees, plants and vines purchased of you not one has died—all growing nicely. I am satisfied Green's is the place to buy stock. Yes sir I am much pleased. Yours very truly, N. S.

Northampton, Mass.
Gentlemen:—Package received to-day in ffne condition. Thanks for your liberality. At the price there could have been no profit. Well worth the price paid. Will remember you when ordering in the future. D.E. H.

The above two photographs were taken at Green's Fruit Farm of the new Diploma Red Currant.. The children of the superintendent, and the dog shown above, are not the least of our farm attractions. Diploma is the largest, most vigorous and productive of all currants. Description and prices on later page

From one Baldwin apple tree I have picked twelve barrels of superior apples. Such a tree can be bought at from twenty to

thirty cents. This tree may live and bear fruit for one hundred years. Supposing all the fruit to be produced by that tree were gathered together at one time how many carloads would they make? Would it not be a big showing for the small investment of 20 cents? showing for the small investment of 30 cents?

Green's Guarantee-We will replace free or refund the amount paid us for any stock not true to name but are not liable for other damages. All shipments travel at the risk and cost of the purchaser.

C. A. Green likes to hoe in his garden. For many years he has been taking particular care of a few pet trees.

Our artist represents in the cut our C. A. Green hoeing these favorite trees.

THE LUCILE GRAPE—This is an early red market grape. It is hardy, healthy and desirable at the north where many varieties will not ripen early enough. It is a sweet grape and supposed to be a seedling of Wyoming Red. Its crowning glory is the size and compactness of its clusters. It is a good shipper and never drops its berries. Price for 1-year old vines, 60c each.

This illustrates the way to order trees, etc. of Green's Nursery Co. You will find in our catalogue a return envelope, self-addressed. Attach a two cent stamp to this envelope with your order enclosed which should be plainly made out on the order sheet to be found at the back end of this catalogue. Enclose with the order a bank draft, express order, postal money order or cash in registered letter, in payment for the trees you order. This is the way all our business is done. That is we sell for cash with order. We could not sell at the low prices we do on any other basis than this.

YELLOW TRANSPARENT APPLE

DWARF APPLE TREES—While we do not think so highly of dwarf apple trees as of dwarf pear trees we are moderately well supplied with dwarf apple trees. Do not expect large trees of dwarf apple since they are branched low. The price of dwarf apple

trees is 40c each. We have the following varieties: Fameuse, Gravenstein, Carolina Red June, Baldwin, Bismark, Early Strawberry, Wealthy and Yellow Transparent.

Photograph of E. E. Reynolds, Madison County, our patron. Apples in crate are Wolf River. Basket at left Wealthy. Basket in front of crate Detroit Red. Next to the righ Tolman Sweet. The Pacific Coast cannot beat this. Notice that this country is a Paradise for fruit growers. Such apples as era shown in the above photograph cannot be produced in many other countries than this. There are a few people who appreciate the fact that they are living in a marvelous fruit country. Consider the pleasure of producing apples like those shown in the above photograph.

LOAD OF GREEN'S TREES BOXED AND ON WAY TO EXPRESS OR FREIGHT OFFICE

HOW TO GROW APPLES

"He who plants a tree plants hope."
"He who plants an orchard plants a home."

Hilly or rocky fields may often be profitably occupied by apple orchards, if the soil is fertile. Even if the soil cannot be plowed a profitable apple orchard may be established by mulching the soil about each tree or stirring it with the spade or pick until the trees become firmly established. Apple trees require fertile soil, such as is demanded for corn or wheat. Select an elevated site for any kind of orchard in preference to low ground, unless the low ground is located near a large body of water, which protects it from frost. In planting an apple or other orchard the best method is tomark out the land with an ordinary corn marker, the same as for planting corn: then locate the trees in every fifth row, if that is the distance you desire.

In this way your trees will form rows from every point of view, without any trouble in sighting or sticking stakes. After the trees are planted the ground is marked between the trees for planting corn or potatoes. Sometimes strawberries and other small fruits are planted between the trees. I know of many orchards in Western New York embracing only an acre that have yielded the largest portion of the profits of the entire farm; these acre orchards would often yield two hundred barrels of apples, sometimes four hundred barrels. I have known these apples to net two dollars per barrel; thus in favored seasons this orchard would bring in more money than all the other crops united, on a one hundred acre farm. He who would make his farm attractive to family or home, be it in city or country, must surround it with different kinds of fruits. Among these the apple is king. No fruit can be put to so many uses as the apple; it is in season almost the year 'round; the earliest coming at harvest, the latest keeping until harvest time. No fruit is more wholesome, no tree is more beautiful in blossom. An apple tree which may be purchased for fifteen cents you would not have taken out of your garden for fifteen dollars, after it had begun to bear its Juscious and beautiful crops. The beautiful red apple, the sprightly yellow apple, the cunning striped apple, the delicious tart apple, and the rich sweet apple—all give you life and health. Apple trees should be planted 30 to 40 feet apart each way.

HOW TO LAY OUT AN APPLE ORCHARD

The larger trees represented in the above cut are those for a permanent orchard. The smaller represent either plum or peach trees used as fillers.

IF APPLE TREES are planted thirty feet or more apart each way, rows of plum trees can be planted between the apples, which grow more rapidly and so protect them from the winds and thus proving a great benefit to the apple trees. After eight or ten years of productiveness, as the space is needed for the apples, the plum trees may be removed, and at the same time having yielded the planter a large return for his outlay and labor.

NO FARM CROP, on the average, will produce one fourth as much income per acre as will a good apple orchard. The average price paid for the fruit is steadily on the increase, and the enormous demand for home consumption, foreign shipping, canning and evaporating, assures you that it will continue to increase. We especially recommend planting long keeping, winter varieties such as Baldwin, Northern Spy, Wagener, Wismer's Dessert, Shiawassee Beauty, Pewaukee, and Blenheim Orange.

NUMBER OF TREES to an acre if planted 30 feet apart, 50 trees; 35 feet apart, 35 trees; 40 feet apart, 27 trees.

PRICES OF APPLES AND CRABS

Except where otherwise noted. All prices subject to change without notice.

First-class Largest Size, 30 cents \$2.90 \$14.00 \$28.00 First-class Medium or Orchard Planting Size, 25 `` 2.40 11.00 22.00 First-class Smaller Size, Branched, 20 `` 1.90 8.00 16.00

First-class Smaller Size, Branched, 20 "1.90 8.00 16.00 All trees carefully graded. The lighter grades are clean nice trees, with good roots, well branched, for practical purposes equal to the heavier grades.

PRICE OF RARE OR NEW APPLE TREES

Yellow Belleflower, Tolman Sweet, Blenheim Orange, Golden Sweet, Fameuse, Pound Sweet, McIntosh Red, Jonathan, Roxbury Russet, Banana, Bismarck, Gravenstein, Red Astrachan, R. I. Greening, Sweet Bough, Sutton Beauty, Fanny, Hubbardston.

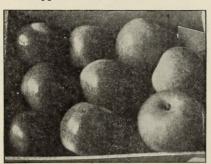

Price for largest size 35 cents each; for medium or orchard planting 30 cents each; for smaller size, branched, 25 cents each.

Price for Green's Improved Baldwin and Wismer's Dessert, smaller size are 50 cents each. Common Baldwin trees at usual price.

See mailing pages of this catalog for prices on apple trees and other items by mail.

SUMMER AND AUTUMN APPLES

YELLOW TRANSPARENT APPLE—If you want the best and most productive yellow summer apple, plant Yellow Transparent. It has succeeded well at Green's fruit farm, where it has borne fruit in nursery rows and on orchard trees the second year planted. It is something like Early Harvest in appearance. It is a stronger, more upright grower and as great a bearer. We had a photograph taken of an orchard tree, laden with fine specimens, borne two years after planting. It has been tested in almost every state in the Union, and has been found hardy, productive, vigorous and desirable in every way. Its quality is superior and this, with its great beauty and wonderful productiveness, makes it a favorite summer apple the world over.

RED ASTRACHAN APPLE—This hardy early variety is well known. A lengthy description is not necessary. Its merits are conceded in nearly every state in this country. Always demands a ready sale at paying prices, if grown for market, and is indispensable for home use. August. 35c for largest size trees, 30c for medium size,, 25c for smaller size.

GOLDEN SWEET—Large, yellow; a superior sweet apple. Tree a free grower, spreading, irregular and productive. August to September. 35c for largest size trees, 30c for medium size, 25c for smaller size.

DUCHESS OF OLDENBURG—A large, beautiful, hardy apple; roundish, streaked red and yellow; tender, juicy, pleasant; a kitchen apple of best quality, esteemed by many for dessert. Tree a vigorous, fine grower, and an early and abundant bearer. September. Succeeds well in east and northwest. The hardiest good fall apple. We find Duchess the best commercial variety, free from blight, a sure cropper, hardy as an oak, having survived in some instances, when all others died (except Wealthy), and all in all a wonderful variety.

FAMEUSE (Snow Apple)—Hardy; medium size; deep crimson; flesh is snowy white, tender, melting and delicious. Tree vigorous with dark wood; one of the finest dessert fruits and valuable for market. November or January. 35c for largest size trees, 30c for medium size, 25c for smaller size.

FANNY-A late summer, red apple, superior in beauty and quality, best of its season. This is a rare apple scions of which were sent us by Charles Downing many years ago. 35c for largest size trees, 30c for medium, 25c for smaller.

SWEET BOUGH-Large, light yellow, tender, sweet and excellent for baking. compact, moderate growth, producing large crops annually and is a profitable market sort. August. 35c for largest size trees, 30c for medium, 25c for smaller.

MAIDEN'S BLUSH APPLE-Hardy and productive, succeeding not only in Eastern states but throughout many of the Western states. September.

FALL PIPPIN—The old favorite, large, light colored fall variety without which no home orchard is complete.

WINTER APPLES

ROME BEAUTY APPLE— This is a hardy, large and handsome apple, almost entirely covered with bright red; of high quality. The flesh is tender, juicy and highly flavored. It is a popular apple over a wide range of country,

particularly in the West. Dec. to Mar.

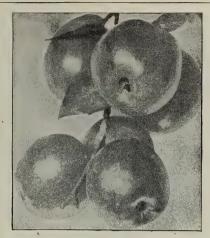

HUBBARDSTON—

(Nonesuch). Large; striped yellow and red; tender, juicy and fine; strong, good bearer. The Hubbardston has long been a popular early winter apple, growing to the largest size, always of good size. It is a handsome red apple, far superior

in quality. Hubbardston has become more popular recently than ever before, since it has been discovered that its leaves have great power to resist attacks of the apple scab fungus. Nov. to Jan. 35c for largest size trees, 30c for medium, 25c for smaller.

Lima, N. Y., May 10, '09. Messrs:—Received trees to-day. Largest, most thrifty trees I ever bought. Thank E. B. R. you for 3 extras.

BALDWIN—(Red Winter Apple)—What the Bartlett pear is to pears, the Baldwin is to apples for the Eastern and Middle States. While sufficiently hardy for these sections, it will not endure the severe climate of the Northwest. In Western New York the advice used to be in planting a thousand trees, plant nine hundred and ninety-nine Baldwins, and plant the other tree a Baldwin also. No variety yields larger crops or bears shipment better, or is more attractive in color and size and shape, than the Baldwin. It is esteemed as an eating apple, and for cooking. Thousands of barrels of this fruit are exported to England annually. For a commercial orchard it can be relied upon. Large, bright red, crisp, juicy, and rich; tree vigorous, upright, and productive. In New England, New York, Ontario and Michigan, this is one of the most popular and profitable sorts for table or market.

YELLOW BELLFLOWER- Season, winter. Hardy, large size, beautiful golden color, often with red blush; conicle in shape. Flesh very tender and fine grained, crisp, juicy, sub-acid, of excellent quality. November to April. 35c for largest size trees, 30c for medium size, 25c for smaller size,

SUTTON BEAUTY APPLE-Medium to large, roundish; waxen, yellow, striped with deep carmine; flesh white, sub-acid; tender, juicy, good. A long keeper. January to February. 35c for largest size trees, 30c for medium size, 25c for smaller size.

WOLF RIVER—Hardy, originating in Wisconsin, and for many years has successfully stood that rigorous climate. Fruit is very large, some specimens weighing 27 ounces; round, flattened, conical, highly colored red. An excellent cooking fruit.

Albany, N. Y., May 27, 1909. Gentlemen :- I am in receipt of and I am very much pleased with the stock sent, Very truly yours.

McINTOSH RED—A hardy Canadian variety. Medium size, nearly covered with dark red. Flesh white, fine, very tender, juicy and refreshing with attractive quince-like flavor. A good annual bearer. A very hardy variety, fruit of which is very attractive in appearance, of deep red color, good size, the flesh very tender and delicious. It is especially desirable for fancy trade. It comes into bearing young, yielding large crops of good fruit almost annually. At Green's fruit farm we regard it as one of the most promising varieties of its class for general cultivation. Its season is from October to January. 35c each for largest size trees, 30c for medium size, 25c for smaller size.

Big Apples in Cut are King. The 2 Top Ones are Banana.

KING (King of Tompkins Co.)—A red winter apple. When you see in the market apples of extraordinary size, beautiful red in color, specimens that attract the attention of everybody who passes by, you may know that these are the King apple, an appropriate name since it is of the largest size and possessed of the greatest beauty. The market is never fully supplied with this variety, since its size and beauty make it in great demand. Tree a vigorous grower, good bearer and hardy. It is also attractive, is always in great demand in the market. Last year dealers were looking everywhere for Kings. Do not fail to plant King Apple.

BISMARCK APPLE—An attractive apple in color and shape, the skin being a bright yellow, covered with bright carmine. One feature of the Bismarck which recommends it to many people is that it bears fruit at a very early age. On a transplanted two-year-old standard tree we counted 26 handsome apples. The fruit is of large size, specimens having been grown weighing nearly two pounds each. The flesh is yellow, tender, juicy and of good quality. It keeps all winter. 35c for largest size trees, 30c for medium size, 25c for smaller size.

BEN DAVIS—Large, handsome, striped; a valuable late keeper. December to March. It is hardy and attractive, succeeds wherever apples are grown. The market men like it, and the customers do too, else they would not continue to buy it. There is no apple that has more favors on account of its hardiness, productiveness, beauty and endurance in shipping. It is excellent for cooking. There are better apples, but where Ben Davis succeeds one can be sure of success, owing to its regular and heavy bearing.

GREENING, RHODE ISLAND—Large, green; tender, rich, sub-acid; productive, very popular. December to April. This large and superior winter apple is famous over a large extent of country, more highly prized for cooking and eating than any other. A good keeper. Beautiful yellow in color when ripe, a most abundant yielder, producing immense crops. Fruit is of large size, free from defects. 35c for largest size trees, 30c for medium size, 25c for smaller size.

ROXBURY RUSSET—Medium to large. Surface rough, greenish covered with russet.

ROXBURY RUSSET— Medium to large. Surface rough, greenish covered with russet. Tree free grower, spreading; a great bearer. Keeps until June. Its great popularity is its productiveness and long keeping. 35c for largest size trees, 30c for medium, 25c smaller.

GREEN'S IMPROVED BALDWIN— Brighter and better quality than old Baldwin. Tree more vigorous grower. Discovered by C. A. Green. Flesh tender, delicious. A long keeper.

Price for Green's New Baldwin, smaller size only 50 cents. Price of good old Baldwin same as other old kinds.

WINTER APPLES

YORK IMPERIAL— (Johnson's Fine Winter)—Medium, white, shaded with crimson in the sun, juicy, crisp, mild sub-acid; tree moderately vigorous and productive. November to February. This is a large and beautiful red winter apple, originating in Pennsylvania where it is a great success. It comes into bearing early and succeeds over a wide extent of country, bearing regular and heavy crops. Its foliage and fruit are free from scab; its skin is yellow covered with bright red and striped; it is a good shipper bringing the highest price. The peculiarity of YORK IMPERIAL, is that though beautiful in form it is a little lop-sided. Its bright red color sells the fruit. What orchardists are continually seeking is a red apple the trees of which are productive and thrifty. Red apples always sell well. Here is a bright red apple which will attract any buyer who visits your orchard. Mr. C. C. Gellwick of Pennsylvania picked six hundred barrels of No. I apples from six acres of York Imperial apple trees only two years planted.

AMERICAN BLUSH—Here is an apple that is not surpassed the world over for large size, great beauty of color, or for excellent quality. It is an apple that should be growing in every garden and orchard. Fruit large, roundish; color bright red on yellow skin; flesh yellow, with a fine, rich, aromatic flavor, sub-acid. The tree is a vigorous grower, exceedingly productive, bearing an abundant crop every year. This is remarkable, since many varieties bear only every other year. The foliage of the American Blush resists scab, apple fungus and other diseases, being tough and leathery, which accounts in part for the great productiveness of the American Blush. Season, November to March.

TOLMAN SWEET—Medium size; color, light yellow; flesh white, firm, rich, and very sweet. Excellent for winter baking. November to April. This is the old favorite, highly prized for baking, etc. Productive, an early bearer, long keeper, bearing shipment well. 35c for largest size trees, 30c for medium size, 25c for smaller size.

DWARF APPLES— Very productive, usually commencing bearing the second year after planting. Excellently adapted to yards and small gardens. Can furnish following varieties: Baldwin, Bismarck, Early Strawberry, Fameuse, Gravenstein, Carolina, Red

June, Wealthy and Yellow Transparent. Too heavy to mail must be sent by Express or Freight. 40c each.

True to Name—You may not realize what it means for a nursery to be able to claim that it labels its trees honestly. There are many nurserymen in this country who are dishonest enough to place wrong labels upon their trees. This fact cannot be discovered until the trees come into bearing. If I had followed this dishonest practice of labeling trees with the name of any variety that a patron might call for I could have saved \$10,000 a year. C. A. GREEN.

Price of This Long-Keeping, Best of Yellow Winter Apples, 35c Each

WINTER BANANA APPLES SOLD AT \$12 A BOX

BANANA APPLE—Banana, best of yellow apples. The news has been flashed over the wires, and widely announced through the press, that the crop of Banana Apples grown in the Hood River District, Oregon, this year sold at \$12 per box, the highest price ever received for apples. These boxes contained less than a bushel of fruit. Green's Nursery Co. first introduced Banana Apples twenty years ago, but its value is just being discovered. For this reason orders are coming in fast, and it is doubtful if there will be enough trees to supply the demand. Therefore, order early. It is of better quality than Swaar says, C. A. Green and Prof. H. E. Van Deman. The tree is vigorous and hardy. It is a great bearer, the fruit is uniformly fair and handsome, the color of pure gold, with red blush. The fruit is large and keeps all winter. It smells and tastes like a banana. Plant the Banana Apple tree. A friend told me that three year old trees bore fruit last fall. Banana is an early fruiting variety. I am, February 8th, eating Banana apples. I carried Banana apples to the Western New York horticultural meeting, giving several of the members an opportunity to test the quality. Many spoke of its pronounced banana flavor; after eating a mouthful of this apple you have the sensation of having eaten bananas for half an hour. We have been growing Banana apple at Green's fruit farm for many years. The tree is a good grower. No orchardist should feel satisfied without having the Banana in his orchard. Dec. to Apr. 35c for largest size trees, 30c for medium size, 25c for smaller size.

WAGENER (Red Winter Apple)— Wagener is one of the most beautiful winter apples ever grown. It is supposed to be a seedling of the Northern Spy. It is much brighter red than the Spy. It is of the higest quality, the flesh being crisp, tender and aromatic. I have known of no apple possessing greater beauty or of finer quality than Wagener, and yet it is little known. It succeeds well East and West. All successful fruit growers desire such an apple as the Wagener, not only for their own eating, but as an attractive fruit to market at home or abroad. No orchardist's list of varieties can be complete without this beautiful and superior flavored apple. Medium to large; deep red in the sun; flesh firm, sub-acid and excellent. Tree a vigorous, handsome upright grower, and very productive; an excellent variety. C. A. Green.

East McKeesport, Pa., Apr. 10, 1909. Dear Sir:—I am very much pleased with the plants, they are simply grand. They are really the nicest I ever saw and I am surprised at the nice large trees for the small price. Yours very truly, Mrs. H. B.

Lewes, Del., Nov., 16, 1909

Sirs:—The case of trees came to hand the 13th inst., and are as fine as I ever saw in my life. Yours truly, T. C. W.

If we have pleased you tell your friends. A pleased patron is our best advertisement.

NORTHERN SPY APPLE

This superior big, red winter apple originated near Rochester, N. Y. It has no superior for beauty and quality. When at its best it is of large size, and is an abundant bearer. The fruit is held on a long, slender stem, which sways in the wind, therefore the Spy does not blow off from the tree. It is a good keeping apple. Season, December to February. This is one of the leading if not the best variety next to Baldwin for New York, Pennsylvania, New Jersey, Indiana, Michigan, and the New England States.

WISMER'S DESSERT—Large, bright red, season winter. Hardy. Best in quality. The Dollar apple. The tree is iron-clad in hardines, vigorous in growth, healthy in constitution. It bears very early,

regularly and freely.

Price smaller size only 50 cents each.

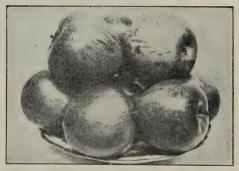

STARK—A hardy winter apple; tree a good grower, upright and spreading; good bearer, and much valued as a late keeper and fine market sort; fruit large greenish yellow, shaded and striped with dark red and sprinkled with brown dots; good to best. January to June.

ONTARIO—Hardy, fine, thrifty grower, very productive. October to February. 35c for largest size trees, 30c for medium size 25c for smaller size.

GREEN'S BARGAIN APPLE COLLECTION FOR \$1.30

- I Northern Spy, I York Imperial,
- I Winter Banana, I McIntosh,
- I Wealthy, I Yellow Transparent.

SIX TREES: First-class medium orchard planting size. Special price all for \$1,30,

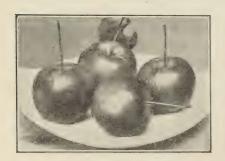

PEWAUKEE—Raised from the seed of Oldenburg. Fruit medium to large, roundish oblate; skin bright yellow, striped and splashed with dark red; flesh white, tender, juicy, sub-acid. Esteemed especially for cold climates, on account of its hardiness. We are often asked to supply a red winter apple that is hardy enough for Iowa, Minnesota, Maine and Vermont, Pewaukee is that variety. Its parentage tells the story. It is like Oldenburg in hardiness. Tree is healthy and long-lived, comes into bearing early and is a reliable cropper, often yielding heavy crops of fruit annually. It is especially valuable for sections where hardiness and productiveness are the chief objects. November to May.

POUND SWEET—A late fall and early winter apple, highly prized for eating or for baking. Fruit large size, greenish yellow, uniformly, fair, smooth, and marketable. 35c for largest size trees, 30c for medium size, 25c for smaller size.

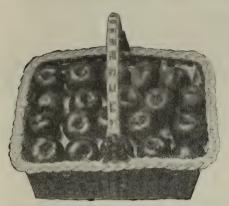

WEALTHY-VERY HARDY, EARLY WINTER APPLE

WEALTHY APPLE—This is a beautiful hardy winter apple, originating in Minnesota. It is gaining in popularity each year on account of beauty and quality, as well as its hardiness. It is productive and an acquisition everywhere. Fruit large, roundish; skin smooth, oily, covered with a dark red. Flesh white, tender, juicy, vinous, sub-acid; quality very good. This is one of the few most desirable varieties for Minnesota, Wisconsin, Iowa, Nebraska, as well as the Eastern and Middle states. In season it differs according to locality; in New York and neighboring states its season is December to February and earlier in others.

HYSLOP—Fruit large, deep crimson; produced in clusters; roundish, with thick blue bloom; flesh yellow, sub-acid: good for cider and culinary purposes; popular on account of its large size, beauty and hardiness. October.

TRANSCENDENT CRAB APPLE-This is one of the best of all crab apples, is popular over the entire country. It is perfectly hardy everywhere, and an immense bearer, yielding large crops every year. It is also a rapid grower and often bears fruit three years after planting. The color of this crab apple is as bright as the brightest red rose. As I have been driving by these trees in farmers' yards, filled with fruit, from a distance they seemed to look like red roses. These trees were beautiful objects when thus laden with bright red apples. The fruit of this crab is held in great esteem by housewives for making jelly, pickles and preserves. They can be dried, cooked, canned, or preserved with the skin on, saving a great amount of trouble. It is especially valuable for cider. September. Price of the varieties of Crab Apple Trees on this page: Firstclass trees, 2 to 3 years, 5 feet high, 25c each. Extra size, 6 feet high, 30c each.

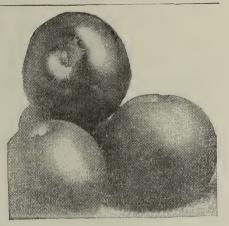

WALBRIDGE— Hardy, medium size, oblate, regular; skin pale yellow shaded with red; flesh crisp, tender, juicy. Esteemed especially in cold climates, for its hardiness and productiveness. Jan. to May.

GANO—Somewhat resembling Ben Davis, but a great improvement on that variety. Very valuable for the middle west and south western states and a variety that will help sell the orchard every time. Very productive. Dark red in color.

STAYMAN'S WINESAP—This is a large reddish apple of superior quality. It has a delightful flavor, and tender flesh. It is a great favorite throughout the west. Price 35c each for largest size trees, 30c for medium size, 25c for smaller size.

APPLE TREES BY MAIL—We offer a good assortment of 25,000 trees by mail postpaid. See list and prices in mail pages at back of this catalog.

NORTHWESTERN GREENING—A Wisconsin seeding of great value; has stood the most trying tests and found to be equal to Wealthy in point of hardiness; fruit large, smooth, greenish yellow; flesh fine grained, juicy, firm, good quality. January to April.

JONATHAN — Medium, roundish, yellow, nearly covered with red, fine grained, tender and finely flavored. Tree slender and spreading with light-colored shoots. Great apple of the west and northwestern states.

Succeeds at East also. Most beautiful of Apples. Season November to April. 35c for largest size trees, 30c for medium size, 25c for smaller size.

Complete list and prices for the different Standard varieties of Apple Trees Grown and for sale by us:

American Blush, *Alexander, Baldwin, *Banana, Ben Davis, *Bellflower, *Blenheim Orange, *Bismarck, Duchess of O., Excelsior Crab, Fall Pippin, Fallawater, *Fameuse, *Fanny, Gano, *Gravenstein, *Grimes Golden, *Green's Baldwin, *Golden Sweet, Hubbardston, Hyslop Crab, *Jonathan, King, Maiden's Blush, *McIntosh, *M. Greening, Rome Beauty, *Roxbury Russet, Stark, *Stayman's Winesap, *Sutton Beauty, *Sweet Bough, *Tolman's Sweet, Transcendant Crab, Walbridge, Wagener, Wealthy, *Winesap, *Wismer's Dessert, Wolf River, *Yellow Transparent, York Imperial.

Prices of varieties with * star attached are Largest size 35 cents each, Medium size 30 cents each, smaller size 25 cents each, except Green's Baldwin and Wismer's Dessert which can be supplied in smaller size only at 50 cents each. Price of other varieties of Apple trees, as above, 30 cents each for largest; 25 cents each for medium size, and 20 cents each for smaller size, which are 2 to 3 years old.

APPLE TREES are in very short supply everywhere. Orders should be sent early and second choice named, or order marked no substitution on variety if no other variety acceptable.

Year after year we are expected to meet the competition of dishonest men, who do not care whether the trees they sell live or die, or whether they are true to name or falsely labeled. This is not fair competition.

STANDARD PEAR TREES (on Pear Roots)

PRICES FOR STANDARD PEARS

EXCEPT WHERE OTHERWISE NOTED

First-class Largest Size 30 cents First-class Medium or Orchard Planting Size 11.25 22.50 25 66 2.40 First-class Smaller Size, Branched 20 1.80 7.50 15.00

All trees carefully graded. The lighter grades are clean, nice trees, with good roots, well branched, for practical purposes equal to the heavier grades.

NEW PEARS-Gans Early Pear, Worden Seckle and Vermont Beauty 40 cents for the largest size, 35 cents for the medium or orchard planting size, 25 cents for smaller size, branched.

KOONCE PEAR—This is a variety resembling Kieffer. It is productive, of good size and attractive. In quality it is similar

to Kieffer, Standard.

VERMONT BEAUTY—This beautiful pear originated in Vermont, thus it can be relied upon for hardiness. It is medium in size. It's color is bright yellow, covered with crimson, making it indeed a beauty. It's flesh is melting and sprightly. It is of the best quality and is remarkably productive. This is one of the newer varieties that you should not overlook. Season October to November, 40c each for largest size, 35c for medium size, and 25c for smaller size.

WORDEN-SECKEL PEAR - This is a seedling of the Seckel, which it resembles and fully equals in flavor and quality, and far surpasses all in size, color, form and beauty. This beautiful and delicious pear attracted wide attention when introduced recently by one of the large nurseries. Trees were sold at \$1.00 each and were well worth the price. In quality it is rated very high. In size it is much larger than Seckel. It is shaped like Bartlett but is not so large as Bartlett. A tree of this beautiful pear is an object of beauty on the home ground when laden with the beautiful specimens. is when you come to eat the fruit that you get the greatest delight. Do not fail to plant the Worden Seckel. 40c each for largest size, 35c for medium size, 25c for smaller size.

KIEFFER HARDY WINTER PEAR— The Kieffer has many admirers on account

of its great productiveness each year, splendid growth and selling well in market. For the home market it will be a favorite for canning. Some like the fruit for eating out of hand and everybody admires the tree, which is as good an ornamental tree as ever graced a lawn or dooryard. One fruit grower said: "Owing to the question of quality he thought it would not sell, but the past season buyers ran after him and sought the Kieffer" Its looks sell it He has 1,600 trees. Those ten years from the bud, were as large as Bartletts 25 years old. The fruit hangs on well, is not liable to be blown off, and is good to handle because it is hard when fit to pick. The Kieffer succeeds best as a standard. We are now learning how to ripen Kieffer. When well ripened it is a good and beautiful pear.

We have 50,000 Dwarf Pears. For prices and full list see page 18.

SCENES IN GREEN'S BARTLETT PEAR ORCHARD

BARTLETT PEARS, KING OF MARKET PEARS

BARTLETT PEAR-Successful as Standard or Dwarf. A veteran fruit grower near Rochester, N. Y., has planted 5,000 Bartlett pear trees. They may be kept in cold storage, and sold when there is no other fruit in the market. They can be grown about as cheap as apples. Dwarf Bartlett pears in C. A. Green's garden only 5 feet high were filled with beautiful specimens. What the Concord is among grapes, the Baldwin among apple, the Crawford among peaches, is the Bartlett among pears. It is the most popular pear, both for home use and market, that the world has ever known. It is buttery and melting, with a rich flavor. The tree is vigorous in growth. Many people remove half of the fruit in August, ripening this for market, thus relieving the tree of its strain and securing larger fruit from that which remains on the tree. As the Bartlett is liable to overbear, nearly half of the fruit should be removed early in the season when about the size of a hickory nut. If this is done and the trees are kept in cultivated soil and well fertilized, they will bear profitable crops of the finest specimens. All pears

should be picked before fully ripe to secure best qualities. Season September.

CLAPP'S FAVORITE PEAR—Standard and Dwarf. Season earlier than Bartlett. This

is without doubt the most productive pear in cultivation. Every limb is a veritable rope of large reddish pears. A splendid pear resembling Bartlett and ripening a few days earlier. A cross between Bartlett and Flemish Beauty;

the tree is hardy and vigorous, either as standard or dwarf. Care should be taken to pick the fruit ten days before it ripens upon the tree. This pear is very large, remarkably beautiful and a prolific bearer. No collection is complete without it. Larger than Bartlett and has a handsome red side. August.

For 30 years I have preached and persuaded people to plant orchards and fruit gardens. Now it is proven that there is no method of occupying the soil so profitably as by planting trees, berry bushes or grapevines.—C. A. GREEN.

We have supplied all classes from John D. Rockefeller and Ex-president Theodore Roosevelt to Bill Nye,

WILDER EARLY PEAR

WILDER EARLY PEAR — Pleases all because beautiful, red and yellow. It is a good grower. Second, it produces a crop early. Two-year grafts at the nursery and trees four years old produce a lot of fruit. Third, the quality of the fruit is the best. Fourth, one does not have to wait until frost to get it. This is the pear that I discovered in Ohio. I am its godfather. I introduced it years ago. It is of better quality than Bartlett. Season early August.

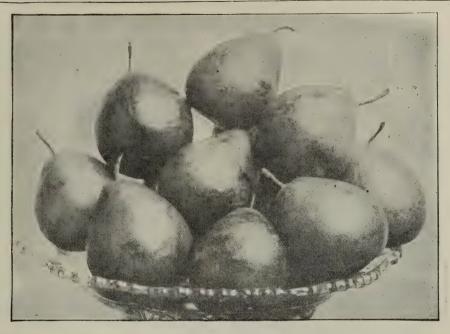

SECKEL PEAR—Standard and Dwarf. The standard of excellence in the pear, small, but of the highest flavor and production. Small Seckels sell better than large, if smooth and fair.

Green's List of Standard Pears given in order of ripening: Wilder Early, Koonce, Gans, Clapp's Favorite, Bartlett, Louise Bonne, Seckel, Flemish Beauty, Sheldon, Vermont Beauty, Worden Seckel, Anjou, Duchesse, Kieffer, Lawrence.

DUCHESS PEAR—(Angouleme)—Standard and Dwarf. Trees of the Duchess are great yielders, and being vigorous growers are money makers. What the Bartlett pear is as a standard, the Duchess pear is as a Dwarf. The Duchess tree has a vigorous and healthy growth, and bears uniformly heavy crops of large and attractive fruit. There is no pear in existence which outyields the Duchess. The fruit is prized as a dessert fruit or for cooking.

ANJOU—(Beurre d'Anjou) — Standard and Dwarf. A large, handsome pear, buttery and melting, with sprightly, vinous flavor; keeps into mid-winter. Tree a vigorous grower and a good bearer.

GANS SEEDLING PEAR

GANS SEEDLING PEAR-New.-This valuable summer pear was sent us by the originator, who is an old friend and patron, six years ago. This has given us time to fruit the pear at Green's fruit farm and to test its merits. Our C. A. Green is greatly pleased with it. It is a valuable early variety of high quality. Ellwanger & Barry describe it as follows: "A fine early pear, ripening just after Tyson and a week or ten days before Bartlett." A surprise is in store for you in the Gans pear. It is not only surprisingly early but is splendid to eat, and is of good size. Price of Standard 40c, 35c, or 25c as per size.

LOUISE BONNE OF JERSEY-A large, beautiful, first-rate pear, yellow, with a dark red cheek, melting, vinous, buttery and rich. Tree an erect grower and most abundant bearer: September and October. No Dwarfs.

SHELDON PEAR—First

quality, large, round, russet

and red, melting, rich and

delicious. Tree vigorous, erect and handsome, and

bears well when grown. As a standard, should be more largely planted. The best of Sheldon. and very vigorous and pro-

all pears for high quality, ductive. It is better than Bosc. Dwarfs.—C. A. Green.

LAWRENCE—Late Winter Pear—Standard and Dwarf.—Size, medium to large, obovate, golden yellow, flesh melting, with a pleasant aromatic flavor. Tree a moderate grower and abundant bearer. I consider this the best long keeping winter pear.— C. A. Green.

FLEMISH BEAUTY-A large, beautiful, melting, sweet pear. Tree very hardy, vigorous and fruitful; succeeds well in most parts of the country. Needs an open sunny location on well drained soil for best results. Those who have not eaten Flemish Beauty pears have a rich treat in store. Flesh is tender, juicy and highly flavored.-C. A. Season September and October.

Green's Trees Better Than Ever.—While the trees we sell are always good because carefully graded they are better this year than usual. I have just been looking over the apple, pear, peach, plum, quince, cherry and other trees and am proud of them. No matter whether you order the large size, the medium, or the small size, you will get good trees. Take my word for it.—C. A. GREEN.

PRICES FOR DWARF PEAR TREES

EXCEPT WHERE OTHERWISE NOTED

Each \$1.75 First-class Largest Size 25 cents \$7,50 \$15.00 First-class Medium Orchard Planting Size 20 6.6 1.50 6.00 12.00 66 First-class Smaller Size, Branched 15 1.25 5.00 10.00

All trees carefully graded. The lighter grades are clean, nice trees with good roots, well branched, for practical purposes equal to the heavier grades.

DWARF, VERMONT BEAUTY, WOR-DEN SECKEL, and GAN'S SEEDLING PEARS, (new), 25 cents, 20 cents or 18 cents each.

DUCHESS PEAR—(Duchesse d'Angouleme). A fruit grower writes me that Duchess dwarf pear trees give uniformly large crops of pears of marvelous size and good quality. He says that in his locality the Duchess is grown more largely than any other, several growers having from three to ten acre orchards, and they find it a profitable fruit. Trees of the Duchess are great yielders, and being vigorous growers are money What the Bartlett pear is as a standard, the Duchess pear is as a Dwarf. The Duchess tree has a vigorous and healthy growth, and bears uniformly heavy crops of large and attractive fruit. There is no pear large and attractive fruit. in existence which outyields the Duchess. The fruit is prized as a dessert fruit or for cooking. Like all Dwarf pears, it should have the branches of the last season's growth

cut back at least one-half every fall or in the spring before the growth begins.

DWARF PEAR TREES—Dwarf pears budded on quince roots do not grow high or branch wide, therefore dwarf pear trees are particularly desirable for small gardens. They bear fruit at once after planting. The finest specimens can be grown on dwarf pear trees, therefore it is a good way to test varieties. Dwarf pear trees are attractive in the garden and are worth planting for an ornament alone. All the pears offered as dwarfs we have as standards. Sheldon pear does not grow as dwarf.

DWARF PEAR HEDGE—I plant dwarf pear trees in a row through my garden each tree three feet apart in the row. These bear fruit at once and delight all who see them yielding the largest fruit and an abundance of it. They may be planted in place of a fence on line between village lots.-C. A. Green.

Green's list of varieties of DWARF PEAR TREES offered, given in the order in which they ripen. For description of varieties see standard pears on preceding pages.

Burbank Japan Plum Tree

PLUM CULTURE.

There should be six or more plum trees in every garden or orchard. Plums are not difficult to cultivate, and they are among the hardiest of our orchard fruits. Taking all into consideration, the best soil for plums is a loose, deep, gravelly loam, with an open sub-soil, such as is suited for apples or potatoes, although almost any soil may be used provided it is well drained.

The trees can be planted much closer together than apple or pear, and yet in field cultivation it is not best to crowd any kind of fruit trees; but in gardens plums will fruit well when planted ten or twelve feet apart. Plum trees bear at an early age. The yield of plums from an acre is surprising. It will succeed on rich, clayey or sandy soil. Plum trees are usually planted when two years old from the bud, although some of the strong growing kinds, Burbank, Abundance and other Japan kinds, especially, may be planted a year old with good results. Plum trees are planted as far apart as peaches; that is, from 15 to 18 feet apart each way. Many growers prefer to plant closer one way than the other, and eventually to stop cultivation in one direction. If this system is used they may be placed 18 or 20 feet apart one way, and from 10 to 12 feet the other way.

List of Plums offered given in order of ripening:

Red June, Abundance, Peter's Vellow Gage, Climax, Bradshaw, Niagara, Moore's Arctic, Imperial Gage, Shiro, Washington, Burbank, Lombard, Shipper's Pride, Gueii, Pond's Seedling, Reine Claude, Lincoln, Yellow Egg, Beauty of Naples, Coe's Golden, Wickson's, Grand Duke, Monarch, Green Gage, German Prune, Italian Prune, York State, Shropshire Damson, Thanksgiving.

THE BURBANK PLUM

It ripens later than the Abundance. There are few or none of the Japanese plums so far generally tested, that have proven of so much worth as the Burbank. It is an abundant bearer, and several years' trial has proved it to be hardy in almost the entire United States.

Burbank plums are making a good record over a large extent of this country, even in the Rocky mountain region. They bear abundantly at an early age. The fruit is exceedingly beautiful, of fair quality, and is especially desirable for canning. These Japan plum trees bear so abundantly they overflow the market during a season when plum orchards are bearing heavy crops. The Japan plums do not rot so easily at Green's fruit farm as the other varieties. We can pick them a week before fully ripe. They have the faculty of ripening up nicely after being thus early picked, and are not so liable to rot when picked very early. See illustration, etc. in following pages.

CHAS. A. GREEN recommends the following list of plums for planting in different States named below. Other varieties succeed there, but those named are the leaders:

For New England, New York, New Jersey, Pennsylvania, Indiana and Michigan:

Burbank, Abundance,
Red June, Lombard,
Bradshaw, Niagara,
York State Prune, Gueii,
Shipper's Pride, Reine Claude,
Thanksgiving.

For Illinois, Wisconsin, Missouri, Kansas, Minnesota, Iowa and Nebraska, all hardy:

Burbank, Abundance,
Damson, Lombard,
Red June, Gueii,
Thanksgiving.

For Delaware, Maryland, Virginia, West Virginia, Kentucky and Tennessee:

Burbank, Gueii,
Red June, Abundance,
Damson, Reine Claude,
Bradshaw, Shipper's Pride,
York State Prune, Thanksgiving.

YORK STATE PRUNE. LARGE, BEAUTIFUL AND OF SUPERIOR QUALITY.

YORK STATE is one of the largest, best in quality and most productive of all prunes or plums. Size large; color dark blue, covered with purple blush; flesh yellow and delicious; freestone, ripening the last week in September, at Rochester, N. Y. This prune originated at Dansville, N. Y., where it has been grown largely by the Germans, who are great fruit growers. It is a seedling of the German Prune and has been sold by these Germans for German Prune to Buffalo fruit buyers in large quantities at profitable prices. It resembles Fellemberg more than it does German Prune. York State Prune is a vigorous grower, and is healthy and hardy here at Rochester. September.

I planted some seventy-five plum trees on a portion of my lot, built a fence around them and kept hens among the trees. Many of the trees commenced to bear the second season after planting. I remember one tree that gave me a half bushel of beautiful plums the next season after it was set out. Another tree produced four bushels of plums, so it will be seen that there was money in plums. The last season I lived on the place I got about 75 bushels of plums from the 75 trees and several of the trees were not old enough to bear. The next season it was estimated that there was 100 bushels.

PROFIT IN GROWING PRUNES—
There is no easily grown fruit that gives greater or more certain profit than the German prune. They were introduced in this country by Germans many years ago, and for a time these furnished the only market for them. But the prunes as a fruit for drying has entirely surpassed the plum, and

though it is always dried whole, the seed is not troublesome to the eater. The Pacific Coast States have furnished most of the prunes for commerce. But it is a fruit that succeeds equally well in the East, with the advantage that if more grown near our large cities, there will be considerable demand for the fruit for eating when ripened, but not dried.

LOMBARD PLUM, Hardy and productive.—Lombard is a great favorite for the following reasons: The tree adapts itself to any locality; it is extremely hardy, producing good crops where many varieties will not grow; it is a strong growing tree-trees on our grounds five years of age being as large again as some varieties planted the same year; it is exceedingly productive. My experience has been that it outyields most other varieties, and yet all varieties of plums are remarkably productive. It is not equal to some varieties in quality, yet it is enjoyable eaten out of hand, desirable for canning and other domestic purposes. The fruit usually hangs so thick on the limbs that we are compelled to thin out one half. The more you thin it, the larger, brighter and better the remaining fruit will be. It is a handsome reddish plum, flesh yellow, juicy and pleasant. It is an excellent variety, and should be planted in all gardens and orchards. It can be relied upon for a crop often when some other varieties fail. August.

THE WONDERFUL LOMBARD PLUM TREES.

GENERAL LIST OF PLUMS OFFERED

CLIMAX—Abundantly productive of its very large, heartshaped fruits, which are a deep rich red, fragrant, sweetfleshed and fine in every way, One of the earliest of all plums to ripen. The tree is strong, thrifty and hardy. Large Japan variety. July.

COES GOLDEN DROP (or Silver Prune) -Large yellow; a great favorite. Season late. September.

Green's New Plum Tree Collection Offer

Green's Special Prices for six first-class medium size trees as above \$1.25.

GRAND DUKE - Color of Bradshaw: fruit very large, of fine quality, free from rot; very productive. Tree moderate grower, one of the best, largest size. Last Sept.

IMPERIAL GAGE-Large, pale green, juicy, sweet, rich and excellent. Aug.

LINCOLN—A large reddish blue variety. Good quality, very attractive. Season medium.

MOORE'S ARCTIC- Small, purplishblack, juicy, sweet; immense bearer; one of the hardiest in bud and bloom. Sept.

MONARCH—Very large, roundish oval: dark purplish blue, freestone, of excellent quality. An abundant bearer. Season Oct.

WICKSON—(Japan)—Fruit remarkably handsome, very large, long, heart-shaped, color deep maroon red, covered with white bloom; flesh firm and meaty, yellow, rich and aromatic; cling; pit small. Tree an unright rices are respectively. upright vigorous grower. Excellent keeper and shipper, is being planted largely for market. Early Sept.

THANKSGIVING PLUM, VERY HARDY AND PRODUCTIVE.

RIPENS OCTOBER FIRST

THE THANKSGIVING HARDY PLUM —Very productive, good quality and long keeper. It will keep for weeks after picking, like an apple. Further experience with this valuable plum leads us to think that we have not claimed enough for it. We did not know that it was a very hardy variety until the winter of 1904 established that fact. This winter was the most severe ever experienced, and in consequence nearly all plum trees growing in the nursery rows in this country were injured or destroyed. The Thanksgiving Plum stood up nobly, not being hurt in the least, where all other varieties but natives were destroyed. Notice that Thanksgiving Plum is not only a variety of superior merit in many other respects, but that it is hardy makes this one of the most valuable varieties of the age. Thanksgiving Plum is also a very vigorous grower; it makes a nice straight tree in the nursery row. October 1st.

OCTOBER PURPLE—Bears abundant crops of large; round, reddish purple plums of good quality. One of the largest and strongest-growing Japan Plums. The best for late market.

POND-(Hungarian Prune) A magnificent plum, red, changing to violet. One of the most attractive. Sept.

PETER'S YELLOW GAGE-Large, oval, bright yellow, rich, juicy, fine quality. A good grower. Sept.

A BRANCH OF BURBANK JAPAN PLUM SHOWING ITS ENORMOUS PRODUCTIVENESS.

Burbank is one of the best of Japan Plums. Unsurpassed for beauty and productiveness, as well as great hardiness of tree, with a foliage so perfect as to contribute in an essential degree to its health. Fruit large, oval, often with a slight neck; skin reddish purple; flesh yellow, juicy and good. Its beauty and value as a market variety is unsurpassed.

RED JUNE—(Japan)—The great early market plum. Medium to large; deep vermilion-red, with beautiful bloom; very showy; flesh light lemon yellow, firm, slightly sub-acid delightful, half-cling with small stone.

YORK STATE PRUNE—The best prune. Extra large blue. Season late Sept.

YELLOW EGG-Very large, egg shaped, productive; excellent for cooking. Aug.

RED JUNE JAPAN PLUM—A vigor

RED JUNE JAPAN PLUM—A vigorous, hardy, upright, spreading tree, as productive as Abundance; fruit medium to large, deep vermilion-red, with handsome bloom, very showy; flesh light lemon-yellow, slightly sub-acid, of good and pleasant quality; half cling; pit small. Of immense value for its very early ripening. It is best in quality of any of the early Japanese varieties and is exceptionally free from rot. Tree strong and spreading, immensely productive and comes into bearing in two or three years.

ABUNDANCE JAPAN PLUM - Fruit large, showy, beautiful. Amber, turning to a rich, bright cherry color, with a decided white bloom, and highly perfumed. Flesh light yellow, exceedingly juicy and tender, of a delicious sweetness, impossible to describe. Stone small and parts readily from For canning it is of greatest excellence. Its season is very early, ripening in advance of other plums thus adding to its special value.

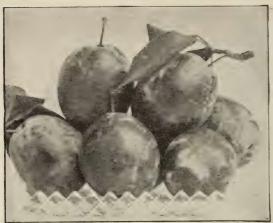

The Abundance plum at Green's fruit farm is a sight to behold. The branches are wreaths of fruit, and they, as well as the tree itself, are held up by props and ropes. Abundance proves to be all that is claimed for. It is to us a blessing and a revelation - a blessing that we may enjoy plums of our own raising, without fear of the curculio. we have the Abundance loaded with beautiful fruit, while not a precaution has been taken to destroy the curculio. Blessed be the Abundance plum. It is well named. Season August.

GERMAN PRUNE—Medium, oval, purple or blue, juicy, rich, fine. Tree vigorous and very productive. One of the best. September. Sells for higher prices in market on account of high quality. A leading favorite. There is no easily grown fruit that gives greater or more certain profit than the German Prune.

BEAUTY OF NAPLES—This plum is of good medium size, of purple color, with slight bloom covered with yellow dots. It is a valuable variety for home use or for market.

A D D I T I O N A L VARIETIES—Apple Plum, Gen. Hand, Hale, Red Egg, Satsuma, Tenant Prune.

NOTICE— Those who receive plants, vines or trees of us, who have complaint to make regarding the condition or grading must notify us within six days after receiving the trees, etc. It is not fair to us to make complaints months or possibly a year after the trees were received. Therefore, unless complaints are made within six days after the receipt of the trees no attention will be given to those complaints.

SHROPSHIRE DAMSON PLUM—This is the best of the Damsons. These are smallish plums, produced in thick clusters or groups, almost hiding the branches from view. It is highly prized for canning and for preserving. The tree is not a rapid grower in the nurseries and is difficult to propagate, therefore trees are always in short supply.

I had quite a crop of plums. From 150 trees, I shipped 3,992 eight pound baskets, 31,936 pounds of fruit. On the same ground, between the trees, I have 1,200 currant bushes, from which I picked 956 quarts of currants. The plums and currants netted me \$650—all from 1¾ acres of ground. The plum trees have been set five years, and the currants four years.—L. E. Delaware.

GUEII—(Blue Magnum Bonum)—This is one of the newer varieties originating in New York State. Season of ripening rather late. The color is dark purple. The flesh is firm, sub-acid and agreeable. Size large. It would be difficult to select a larger or more attractive plum for the garden or orchard than this. A leading plum grower of Geneva, New York, picked and marketed last season 40,000 eight pound baskets of plums. September.

REINE CLAUDE—(Bavay's Green Gage) Very large, greenish, fine flavor. Not surpassed in quality, beauty and size. Sept.

ITALIAN PRUNE—Good size, purple, juicy, delicious, fine for drying. Sept.

SHIPPER'S PRIDE—Large, dark purple, very showy, often measuring two inches in diameter; fine, juicy and sweet. A beautiful and valuable variety. Sept.

SHIRO—(Japan)—A strong grower, wood hardy and wiry, ripening early. Fruit is produced in profusion, medium to large, clear light yellow with thin white bloom, so transparent the pit can be seen through the flesh, which is firm, juicy, rich, pleasant and sub-acid; ripens two weeks before Burbank and nearly as productive.

NIAGARA PLUM— This plum has become exceedingly popular through Western New York, where it originated. It is a very early plum, and valuable for this reason. It is red, large size, making an attractive appearance in market, and possesses good shipping qualities. It bears enormous crops of fruit with great regularity. No one will be disappointed in planting the Niagara plum, either for home use or for market. The tree is an upright grower, vigorous and healthy.

WASHINGTON—A large yellowish variety, excellent. Season late August.

THANKSGIVING— A late blue plum or prune. Valuable for home and market.

BRADSHAW PLUM—A very large and fine early plum, dark violet red, juicy and good. Trees erect and vigorous; very productive; valuable for market. The tree is very hardy and vigorous. As regards productiveness it is unequaled by any plum we have ever fruited. To produce the finest fruit, heavy thinning should be practiced. The quality is excellent, and it is destined to become one of the most popular of all plums for canning, while its attractive color, good quality and shipping properties will cause it to be sought for as a market variety. It ripens ten days to two weeks later than Abundance. This plum resembles Niagara in size, color and general good qualities. It is becoming better known each year, and it is a grand variety, and no collection is complete without it. It is a great favorite for home use, on account of its fine quality, and for market for the reason that it is possessed of great beauty, large size, and is enormously productive.

SWEET OR HEART CHERRIES

GREEN'S TARTARIAN CHERRY—This grand reliable sweet cherry is a great favorite. You should not fail to plant the Green's Tartarian black cherry. Good for eating fresh from tree, canning and market. In front of our Rochester house are two trees which are a wonder to all who see them. They never fail to bear a heavy crop of fine fruit. The trees are forty years old. They have reached an age when most cherry trees begin to fail and to become unproductive, but these trees are as productive as in their earlier years. A notable peculiarity of the fruit upon these trees is that it remains on the trees in an eatable condition for nearly three weeks. I have never known cherries to remain so long upon the trees. The fruit from these trees sells in the market more readily than any other fruit we are acquainted with. It is accepted by our market-men as the Black Tartarian. It has much the same appearance as the Black Tartarian, and yet we have never known that good old variety to remain so long in perfect condition upon the trees, which is a desirable feature in prolonging the season for family use. We call it Green's Tartarian Cherry, not to indicate that it is a new variety, but to indicate that it is what we represent it to be—a superior strain of the Black Tartarian—First of July.

LAMBERT—Largest size 50 cents each, medium or orchard planting size 40 cents each. BING-Largest size 50 cents each, medium or orchard planting size 40 cents each.

One year old sweet cherry trees Bing, Green's Tartarian, Gov. Wood, Lambert, Napoleon, Windsor and Yellow Spanish. SWEETEXTRANICE, well branched, heavy, 4 to 6 feet, one year cherry trees, each 30 cents, \$2.50 per 10. Heavy cherry trees, 1 year old, well branched, 3 to 4 feet, each 22c, \$2.00 per 10. Nice selected mailing size, 1 to 21/2 feet, each 20c postpaid.

There are few trees more attractive to the homemaker and fruit grower than cherries. The sweet cherries are especially desirable for the garden or lawn, on account of their foliage, attractive blossoms, and fruit. The sour cherries are planted by thousands for home use and market. It is only recently that fruit growers have learned of the big profits made in an orchard of cherries.

Cherries are the easiest fruit grown. Trees are sold at the nurseries at low prices, and they succeed on a great variety of soils, and localities. They come early into bearing, and there are many favorable features in regard to them.

Where land is high priced, cherry trees can be planted closely together, in which

condition they will bear for many years; thereafter every other tree can be removed,

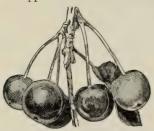

if thought desirable.

Cherry trees will do better with cultivation, but they bear abundantly and produce fine fruit planted along the roadside, along the line of fences in the fields, and where no cultivation is possible. Consider the desirability of planting a cherry orchard of Early Richmond and Montmorency if you wish to add materially to your farm revenue. In any event plant a few trees of both sweet and sour for home use. You will never regret it. We recommend GREEN'S TARTARIAN and WINDSOR for sweets, and DYEHOUSE, EARLY RICHMOND and MONTMORENCY for sours. There are other good kinds.

SWEET OR HEART CHERRIES

GREEN'S TARTARIAN.—Black excel**lent**—See illustration, etc.

LAMBERT CHERRY—(New). One of the largest of the sweet cherries. So far productive. Color, dark red; flesh solid; an excellent shipper. New. 50c and 40c.

NAPOLEON - (Royal Ann) .- Of fine appearance and the very largest size; yellow and amber, with bright red blush; flesh firm, juicy, delicious.

SCHMIDT'S BIGARREAU—Heavilv clustered fruits of largest size, deep crimson black; tender, juicy, well flavored. July.

YELLOW SPANISH-Large, pale yellow, with light red cheek; firm and delicious. Late June.

BING—This new and superior sweet cherry originated near Portland, Oregon and is one of very large size, almost black in color when ripe, of fine quality, very productive, a good shipper. New. 50c and 40c.

CENTENNIAL—A late, firm, large, white variety. A good one.

A Trio of Splendid Sour Cherriesripening in order given: Dyehouse, Early Richmond, Large Montmorency.

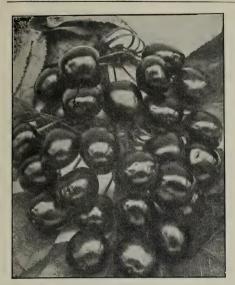

ONE YEAR OLD CHERRY

Green's Introductory Collection To introduce our splendid I year old cherry trees

We offer ten first-class I year trees 4 to All the largest best 5 feet for \$1.50. sweet class.

4 Green's Tartarian, 2 Napoleon, 2 Gov. Wood, I Windsor, I Yellow Spanish, all for \$1.50.

At Green's Fruit Farm I planted a cherry orchard thirty years ago. These trees have been a very profitable part of Green's Fruit Farm.

WINDSOR CHERRY—Tree upright, vigorous and rapid grower; leaves large. Fruit large, roundish, oblong, very firm, juicy, mottled red; flesh pinkish, sometimes streaked. Quality good, heavy bearer. It hangs a long time and does not rot badly. No cherry of recent years has attracted more attention, owing to its large size, beautiful, dark color, almost black; its firmness; its qualifications as a shipper, and its excellent eating qualities. The variety has been recommended by Willard and others of the most prominent fruit growers of the country who have given it a thorough trial, and have found it unexcelled by any variety for home use and for market. It originated in the cold, severe climate of Canada. There is no question about the value of the cherry. Chas. A. Green recommends the variety as the best late home or market sweet variety known to fruit growers.

MONEY IN CHERRIES—Out in Oregon they have a cherry orchard which last year gave a crop worth \$1,100 an acre. The same man had a peach orchard three years old which returned \$800 an acre. Another farmer in the Rogue river district got \$14,000 worth of fruit off seven acres, then sold the seven acres for \$35,000.—Scientific Farmer.

Veterans say that one year cherries bear transplanting better than older trees.

We offer Cherry Trees by mail postpaid see mail pages at end of catalogue.

Greenleaf, N. H., May 1, 1909
Dear Sir:—Pear trees just received O. K.
Conclude they must be those omitted from
my last order, which you were unable to
supply. You are a firm to be relied upon
as you keep patrons' interests in mind. T.A.

ONE YEAR CHERRIES—Some planters do not succeed in transplanting 2 year sweet cherries as well as they do with the sour varieties. Our advice to these is to plant 1 year trees; we have them in the sweets; fine trees. Some planters prefer to plant 1 year old sweet cherries. More likely to live. One year old cherry trees are almost as large as the two year old.

Green's box of one year old Sweet Cherries have arrived.

GOVERNOR WOOD—A rich and delicious large red cherry that hangs well on the tree. Very popular. June. Its color is clear bright red. It is tender, delicious and hangs well on the tree. This is one of those famous varieties that has made cherry growing popular. The tree itself is an ornament for any home owing to its shade and beautiful blossoms, and the beauty of its fruit, to say nothing of the charms of fruit itself for eating.

Bath, R. I., Nov. 5, 1909 Gentlemen:— I wish to thank you for the excellent selection sent me. The order called for varieties your choice. No one could have shipped finer stock. I am perfectly satisfied. G. E.

First-class Smaller Size, Branched -	-		19 "	1.25	5,00	10.00

All trees carefully graded. The lighter grades are clean, nice trees with good roots, well branched for all practical purposes equal to the heavier grades.

MORELLO OR HARDY RED CHERRIES

The sour or Morello class of cherries are more dwarfish in growth than sweet varieties, consequently do not grow as tall in the nursery row. Do not expect all varieties to be of the same height. All are first class of their grade.

 $D\,Y\,E\,H\,O\,U\,S\,E{-}A$ very early and sure bearer; ripens a week before Early Richmond.

MAY DUKE—Large, dark red, juicy, rich; a superior and productive old sort that holds its own well against newcomers. June.

MONTMORENCY (See next page.)

OLIVET—Large; skin, dark red; tender, rich, vinous, with mild sub-acid flavor. Productive.

OSTHEIME—Large, heart-shaped, nearly black when ripe, juicy and rich; fine for dessert and cooking.

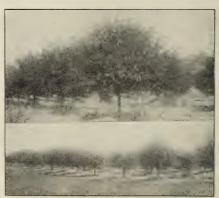

WRAGG—Late, hardy, good. Similar to English Morello.

LARGE ENGLISH MORELLO CHERRY—Without doubt one of the most valuable of this class. Easily grown, generally producing a heavy crop. Fruit dark red, quality good, with a rich, acid flavor; late. Tree very hardy, and recommended for extremely cold latitudes. August.

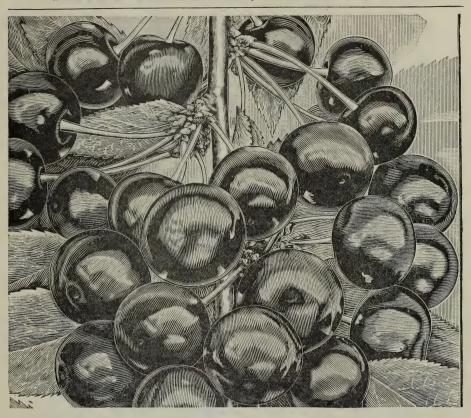

DYEHOUSE—A hardy and valuable cherry. Unquestionably the earliest cherry, ten days earlier than Richmond, fine quality, tree hardier—its early bearing remarkable as its great hardiness. Often bears at two years old, and has the appearance of being covered with a scarlet cloth, such is the abundance of the fruit. Has the smallest pit of any cherry known; a splendid keeper and free from knots. For tarts, pies, and especially for canning, it has no superiors among cherries. June.

HARDY CHERRY ORCHARD AT ROCHESTER,
NEW YORK

EARLY RICHMOND—Well known. A splendid early sour cherry. Very hardy. A favorite with the housewife. While it is desirable to plant other varieties in order to lengthen the season or secure a variety, everybody should plant the Early Richmond. It is a remarkably hardy cherry and bears uniformly large crops of marketable fruit, highly prized at every farm and market. In the cold west where many varieties are disappointing the Early Richmond stands supreme.

MONTMORENCY—King of the hardy cherries. Large, bright, shining red, acid, late, valuable. Hardy and productive. Canning houses demand this variety. You cannot make a mistake in planting it. "For home use and market the Montmorency is valuable." It is a safe reliable, worthy favorite. More money, has been made with Montmorency than with any other. No one sees a glut in the market of the large showy Montmorency. Eighty per cent. of our new orchard will be Montmorency. We have grown hundreds of bushels. The Montmorency brings twice the usual price in market. Plant Montmorency.

Montmorency Cherry is not surpassed in value by any other cherry in the world. It ripens rather late in the season when cherries are scarce. The past season I saw a row of Montmorency cherry trees planted by the road side. These trees were branched low which make picking easy with short ladders. The trees were so densely filled with the bright red fruit they were as handsome as rose bushes. I never before saw such a beautiful sight in the way of cherries. This cherry and all cherries are attracting more attention each year. Cherry orchards are found to be profitable. There is no more attractive tree for the home ground than the cherry in bloom and fruit. Price of Montmorency 25c, large size, 20c for medium size, and 15c for smaller trees. Price by the 100 and 10 lots the

CERTIFICATE
This is to certify that the stock in the nursery of Green's Nursery Co., of Rochester, County of Monroe, State of New York, was duly examined in compliance with the provisions of Section

305, of the Agricultural Law, and it was found to be apparently free from any contagious or infectious disease or diseases, or San Jose scale or other dangerously injurious insect pest or pests. This certificate expires Sept. 1, 1910.

Dept. of Agriculture, Albany, N. Y. R. A. Pearson, Commissioner of Agriculture. Dated Sept. 1, 1909

PLANT A CHERRY TREE

A cherry tree throws its branches over the private roadway leading to my house. The doctor, the pastor, the groceryman, the telegraph messenger boy, in fact almost everybody who enters my grounds stops to pick a few of these beautiful and delicious cherries. The birds also pick a few. Everybody likes cherries. Plant a few cherry trees or a cherry orchard.

The hardy red cherries succeed everywhere. They remain long on the trees without rotting. Well I remember the cherry trees on the old homestead when I was a child.

Cherry pie. Do you like cherry preserves? Do you like the money that cherries will bring to your pocket? If so plant cherry trees.

Do you remember how beautful the cherry tree is when in blossom? It is even more beautiful when filled with bright red fruit. In bloom cherry tree rivals the rose. Cherries are good to eat. Plant a few cherry trees.

How to keep the boy on the farm. Have plenty of fruit of all kinds in the orchard the

garden and berryfield.

How to keep the girls on the farm. Plant flowering shrubs, trailing vines, rose bushes

and grape vines.

The cherry is a neglected fruit. People are just beginning to plant cherry orchards and to learn that the cherry is a very profitable and desirable fruit. If in doubt what to plant, plant the hardy red cherries, such as Montmorency. Early Richmond, etc.

as Montmorency, Early Richmond, etc.

If you do not decide to plant a cherry orchard which would yield you much profit if near market or where you can get pickers do not fail to plant ten or twenty trees about your home. The beauty of these trees in bloom and fruit alone will pay you for your

trouble and expense.

Notice that Rochester, N. Y., is the center of the nursery trade of the world. The best and most enduring trees are produced here in this northern section, trees that will succeed in any part of the world. Get at the facts in regard to careful packing of trees. One of our patrons was absent when his box of trees came from Green's Nursery Co. They lay around for two weeks unopened and yet when planted all these trees lived and flourished.

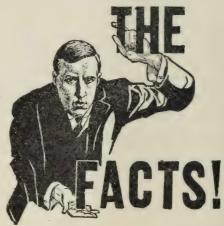

APRICOTS

The Apricot is a delicious fruit. It is grown for home use and market. There is a peculiar lusciousness about the Apricot not noticed in other fruit. Price of trees 4 to 5 feet, 30c, 3 to 4 feet, 25c each.

ROYAL—Large, yellow, juicy, rich and delicious; a very fine variety.

SUPERB—A hardy seedling from Kansas. The best flavored, most productive, hardy apricot yet produced. Quality is exquisite. Medium size, light salmon color.

The facts are as follows: Green's Nursery Co. is devoted to fruit growing as well as to producing plants, vines and trees. At Green's Fruit Farm and nursery almost every kind of fruit is grown and tested. When it comes to budding or grafting trees we have the trees that have produced the finest fruit to cut our scions from. Since we have fruited these trees, plants and vines we know that they are true to name. A certain nurseryman who did not test his scions, by seeing them bear fruit, propagated a clingstone peach for many years supposing it was a Crawford. We have a national reputation for labeling trees true to name and for careful grading. As we are growers of trees, when you buy of us you buy direct of the producer, saving the expenses of a traveling salesman, which adds more than 50% to the cost of trees sold through agents.

PEACH CULTURE

Much has been learned about peach culture within the past four years. At times peach culture has been entirely given up in Western New York and in Connecticut and many other states where now the peach is the most profitable of all orchard crops. It is the most beautiful, most tempting and luscious of northern fruits. There is no fruit marketed which brings a higher price than well grown peaches. At one time it was supposed that only sandy soil was adapted to peach culture; later, it has been claimed that clayey loam is superior to sandy soil. Peaches will succeed on either sandy or clayey loam, if properly cultivated. Peaches will not thrive in uncultivated soil. The soil

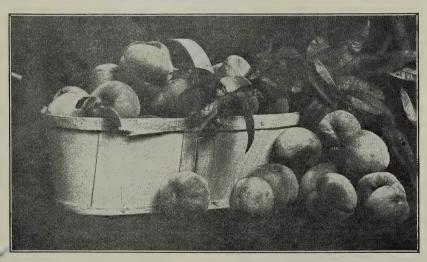

should not be made too rich, as the peach is a rapid growing tree. It has been recently discovered that there are varieties of peach that are very hardy in bud which scarcely ever fail to bear profitable crops, where other varieties around them are destroyed by the severity of winter. The number of varieties of peach has been largely increased of late years, somewhat to the bewilderment of the planter. We have aimed to confine our list to the cream, naming only those varieties which we have deemed best, all things considered. A neighbor, from six and five years old peach trees, picked seventy-five baskets of No. 1 peaches, and five baskets of a lower grade; he sold the best at \$1.00 per basket and the poor ones for 65 cents per basket, netting \$78.25.

PRICES FOR PEACH TREES

EXCEPT WHERE OTHERWISE NOTED

All trees carefully graded. The lighter grades are clean nice trees, with good roots, well branched, for all practical purposes equal to the heavier grades.

CROSBY ONE OF THE MOST HARDY PEACHES

CROSBY FROST-PROOF PEACH—A fine, handsome, yellow peach, with remarkably small pit, that bears regular crops north of the peach belt. Quality delicious; season follows quickly after Early Crawford. Crosby is now so well known that it will be no experiment planting it. It has been planted in nearly all peach-growing states, and is spoken of in the highest terms. Many large orchards of this variety have been planted the past season. The strongest claim for its superiority made over other varieties is the frost-proof character of its fruit buds.

ELBERTA PEACH—LARGE AND PRODUCTIVE

ELBERTA PEACH—Unsurpassed as a valuable, large, beautiful peach of good quality

The best authority on peaches in the United States, planted 60,000 Elberta. Why? Because he well knew its value. This most excellent variety will be called for by the thousand. Orders should be sent in early, while our stock is large.

CRAWFORD'S LATE

seed as a valuable, large, beautiful peach of good quality. The best orchard variety, and valuable also for planting in the garden. A friend near Rochester has planted fifteen acres entirely to Elberta. Elberta is hardier in bud than many varieties, therefore a more uniform cropper. At Green's fruit farm this year we are harvesting a large crop of Elbertas, and yet we had three consecutive frosts last spring that destroyed nearly all peach buds in this locality. Many people have feared that too many Elbertas would be planted, but I think these fears are groundless,

since it is such a valuable variety. Owing to the great demand for Elberta trees, we are compelled to limit somewhat the number of Elberta trees desired with each order. Elberta is large, yellow, with red cheek, juicy and high flavored, flesh yellow; freestone. Season medium early, following quick upon Early Crawford.

CRAWFORD'S LATE—A superb yellow peach, very large, productive, and good; ripens here about the close of the peach season. Season last of September. Not a very late peach—its season is just right. The largest of all the older kinds at Green's fruit farm. It does not overbear, thus does not need thinning. Its quality is superb.

GREEN'S PEACH COLLECTION OFFER

10 PEACH TREES FOR \$1.40

Teleptia Tel

CRAWFORD'S EARLY-A magnificent large yellow peach of good quality. Tree vigorous and prolific; its size, beauty, and productiven ess make it one of the most popular varieties. Season beginning of September. This valuable peach has long been a favorite for large size, beauty and quality of fruit. Most people when they buy peaches ask for Crawford's, knowing but little about any other variety. In past years this was the earliest peach, but now much earlier kinds are known, hence it is about midseason in ripen-

ing. Everybody who plants peach trees plants Crawford's Early. A superior variety that

should not be omitted.

GREENSBORO

GREENSBORO — A good, very early, white-fleshed, red-cheeked peach, hardy, productive and a favorite at Green's fruit farm. The largest and most beautiful colored of all the early varieties.

FITZGERALD—Grows similar to Crawford and ripens between Early and Late Crawford; flesh rich, deep golden yellow, with high character; certainly a very fine peach. The tree commences bearing young, is productive, and in Canada and Michigan has proven one of the hardiest.

NIAGARA PEACHES—PACKED FOR MARKET

NIAGARA PEACH—A new variety, but fully tested by extensive orchard planting near Rochester, N. Y. It may be called the new Elberta, since in appearance it is just like Elberta. It seems to have all the desirable qualities of Elberta with none of its defects. One defect of Elberta is that the foliage is liable to be affected with the fungus that causes leaf curl, while the foliage of Niagara peach cannot be surpassed in healthfulness and vigor, and for its ability to resist fungus, being almost of the character of leather. Another reason is that while Elberta is of good fair quality, Niagara is superb in quality and far superior to Elberta. Niagara ripens one week earlier than Elberta, ripening here September 1st. It is remarkably free from yellows and leaf curl. Prof. Van Deman says: "I have heard the Niagara peach spoken of in the highest terms. Those who have fruited it prefer it to any other, and think it even better than Elberta or Early Crawford. I have seen and eaten Niagara. It is of large size, beautiful, and better in quality than Elberta,"

CHAMPION—Fruit, large, sweet, rich and juicy; skin creamy white, with red cheek, free-stone and a good shipper. Ripens early. Hardy and productive.

GOLD DROP—Large, good quality, hardy; a profitable market sort; follows Crawford Late.

HILL'S CHILI—Fruit medium size, oblong; skin yellow, shaded with dark red; flesh yellow, very rich and sweet; freestone.

EARLY RIVERS—Large, creamy white, with pink cheek, juicy and melting. August.

CHAIR'S CHOICE—Fruit of very large size, yellow, with a red cheek; flesh yellow, firm and of good quality; tree a strong grower and a goodbearer. Ripens just before Smock.

THE VARIETIES OF PEACHES WE OFFER RIPEN IN THE FOLLOWING ORDER—Greensboro, Early Rivers, Champion, Crawford Early, Hill's Chili, Fitzgerald, Crawford Late, Niagara, Elberta, Crosby, Gold Drop, Chair's Choice.

In addition to above we offer a limited quantity in the medium size; Triumph, Waddell, Yellow St. John, Old Mixon, Orange Cling, Mt. Rose, Mayflower, Globe, Carman, Beer's Smoock, Bokara, and Admiral Dewey. All too well known to need description.

ORCHARD OF ORANGE QUINCE AT ROCHESTER, N. Y. VERY PRODUCTIVE.

ORANGE QUINCE—Everyone is well acquainted with the Orange quince, a good old variety that never disappoints the planter—good for home use and for market, and more largely planted than any other variety. Its large, golden yellow fruit of fine quality is to be seen in more or less quantities in nearly every garden or orchard every season, as it rarely fails to produce a crop. This variety is sometimes called the Apple Quince.

CHAMPION QUINCE—This is a large fruited quince. Color, bright yellow; flesh tender and most excellent for making preserves, jellies, marmalades, etc. It has a delicate flavor. The trees are vigorous growers and bear heavy crops of superior fruit. It yields fruit on very young trees soon after planting The fruit keeps well and ships well. Notice that quince trees are scarce this year all over the country.

Price of all varieties of Quinces on this page except Anger's and Meech's: First-class trees, 3 to 5 feet high, 50c each, \$4 per 10. Smaller size, 3 feet high, 35c each, \$3 per 10. For Quince trees by mail, postpaid, see last pages in catalog.

OUR C. A. GREEN WHEN A CHILD

BOURGEAT
QUINCE—There is
no other variety
which grows so vigorously, and which
will keep so long in
perfect condition.
Trees of this quince
grow as rapidly as an
apple tree and attain
the size and shape of
an apple tree. The

Bourgeat quince bears at an early age, producing large crops of exceedingly large and handsome fruit, of a rich golden color. While it ripens soon after the Orange it keeps till midwinter, or it is ready to use at once on maturity. This is a remarkable characteristic. The crop can be held in the hands of the grower or in the hands of the purchaser until the market suits his fancy. It has proved to be free from leaf blight, the leaves keeping green until killed by frost.

ANGER'S QUINCE—A rapid grower, ripens late. Best adapted to the South, 20c to 25c.

MEECH'S PROLIFIC QUINCE—It is rightly named prolific, being prolific in growth, in yield and prolific in all good fruit points that go to make up a good fruit. 50c each.

There is satisfaction in the feeling I have that the products I have sold during the past 25 years have brightened a hundred thousand homes and have added to the revenues of many worthy people.

THE CHAS. A. GREEN NEW WHITE GRAPE-After fruiting this new white grape for several seasons at my Rochester place I am satisfied that it is a valuable variety, a vigorous grower, and an enormous yielder of very large and beautiful clusters of excellent fruit. wariety was sent to me by F. W. Loudon, Janesville,

Wis., the originator of Loudon red raspberry, Jessie Strawberry, Janesville grape and other valuable fruits. He named it the C. A. Green grape, wishing to honor me for having done him a service in introducing Loudon raspberry and the Jessie Strawberry. Price: Strong 2-year-old vines, 30c each, \$2 per 10.

NIAGARA GRAPE

N I A G A R A HARDY WHITE GRAPE - Popular everywhere. Bunch very large and handsome, often shouldered. compact; berries large, round; skin thin, tough, does not crack and carries well; has not much pulp when fully ripe, melting, sweet, with a flavor and aroma peculiarly its own, and

agreeable to most tastes; ripens with Concord, sometimes a little earlier. Vine very vigorous and productive, succeeding well in all sections. Is largely planted by vine-yardists. Price of 2-year-old vines, 10c each, 80c per 10, \$7 per 100, \$50 per 1,000.

REGAL LONG KEEP-ING RED GRAPE—If you want the longest keeping grape, one that you can eat during fall and winter months, plant the Regal. Its quality is Catawba or equal to

Ulster. Regal grape keeps well owing to its tough skin and persistent nature, keeping in fine condition late in the season. I believe it will be a good shipper. Price of 2-year vines, 20c each, \$1.75 per 10.

For prices of other kinds of grape vines apply by letter. We can supply any kind wanted, and any quantity whether one-year or two-year-old.

CONCORD-Monarch of Hardy Grapes.

CONCORD GRAPE-This hardy black grape is decidedly the most popular grape in America, and deservedly so. Bunch large, shouldered, compact, berries large, covered with a rich bloom; skin tender, but sufficiently firm to carry well to distant markets; flesh juicy, sweet pulp, tender; vine a strong grower, very hardy, healthy and productive. For general cultivation the most reliable and profitable variety. Price: 2 year, 10c each, 80c per 10, \$6 per 100, \$40 per 1,000.

MOORE'S EARLY -Clusters of medium size; berries large, round, black, with heavy blue bloom. Desirable for market on account of its earli-

ness, well suited for Canada and northern portions of the United States, Price: 2 years, 15 cents each, \$1.25 per 10, \$7.00 per 100.

ADDITIONAL VARIETIES GRAPES

Brighton-1 yr. 10 cents, 2 yr. 15 cents. Campbell's Early-1 yr. 20 cents. Delaware—1yr. 10 cents, 2 yr. 15 cents. Diamond—I yr. 12 cents, 2 yr. 15 cents. Wing-2 yr. 20 cents.

McPike, black, very large-1 yr. 20 cents, 2 yr. 25 cents.

Eaton, black-1 yr. 20 cents, 2 yr. 25 cents LUCILE (New Early Red)-1 year 60c, See first page for description and cut.

WORDEN GRAPE—If you fail to plant Worden grape you will make a mistake. When it was first introduced it was claimed to be the same as Concord, since it resembles Concord in many respects. It is, however, much earlier than Concord in ripening and larger in size of berry. Its earliness of ripening is a strong point over Concord. It will not ship, however, so well as Concord, being tender in skin, but for home use I know of no grape of greater value.

Everyone plants it. It is an enormous cropper and its vines are vigorous enough to ripen such crops, but the more fruit a vine carries the later will it ripen its fruit. Worden is ripe and gone before Concord comes in. It is an early black grape, very large in cluster and berry, of good quality. Price: Strong vines, 2 year, 10c, each, 80c per 10, \$7per 100, \$50 per 1,000.

GRAPE VINES AT A BARGAIN

10 VINES FOR 98c.

One-third off regular price. Must be sold

We offer 2 Brighton Early Red; 3 Concord, black; 1 Moore's Early, black; 2 Regal, red; 2 Niagara, white; all 2 year-old, first-class grape vines for 98 cents, regular price being \$1.35.

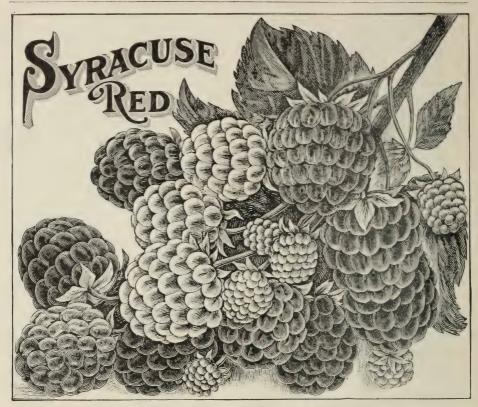

DIAMOND WHITE GRAPE—This is our choice in white grapes. It is an excellent variety for those having only a small garden or those desiring to plant for market. In growth of vine it is marvelous and seems adapted to all localities where grapes are grown. It is a diamond among grapes. Extremely hardy; vine a vigorous grower; foliage large and healthy. Very prolific in bearing; cluster large and handsome. Price: Strong 2-year vines, 15c each, \$1.25 per 10, \$10 per 100.

CAMPBELL'S EARLY—Strong grower, with large, healthy foliage; productive; its keeping and shipping qualities are equalled by no other early grape. Ripens with Moore's Early. Bunch and berry, large glossy

BOTORY TREES OF AMERICAN THE PROPERTY OF THE P

THE SYRACUSE RED RASPBERRY

This is the largest and most productive of all red raspberries. It is very hardy, never requiring protection at Rochester, N. Y., though the thermometer has gone down to twenty degrees below zero. It is also a vigorous grower and continues to fruit during six weeks of summer, from July first to the middle of August.

It does not sucker freely, therefore it has taken us many years to secure a supply of plants. This is greatly in its favor since its vitality goes to the production of fruit and not to useless suckers. The quality is of the highest character. Its color is a beautiful bright crimson; its flesh is firm. It is double the size of Cuthbert and remains much longer in bearing. Do not expect a low price for plants, since it is hard to propagate, multiplying very slowly.

C. A. Green says that this is the greatest and most valuable raspberry the world has ever seen. It is the largest of all bright red raspberries. Its flavor is of the highest grade. It is remarkably attractive and continues in bearing for over a month, but best of all it is perfectly hardy in Rochester during the most severe winters we have known.

Price \$1 for each strong well rooted plant, or \$8.50 for 10 plants. One big plant given free with every \$5 order, two plants free with every \$10 order or over. No other gift where this is chosen. No gift with collection offers.

Green's Nursery Company: We are in receipt of the sample of your new red raspberry named Syracuse, and regard it as most promising, it being large and handsome and of good quality. Ellwanger & Barry.

THE CASH WITH ORDER WAY

SAVES YOU 50 PER CENT.

OURS IS THE CASH WITH ORDER WAY.

THE CUTHBERT RED RASP-BERRY. Large, Productive, Attractive. — This is a valuable variety well tested throughout the country. It has given good results both for home use and market. When it was introduced the demand for plants was far beyond the capacity of any one to supply. It marked a new era in raspberry growing. Previous to the Cuthbert, red raspberries were a novelty in the market and sold at from fifteen to twenty-five cents per quart. Cuthbert was largely planted and it succeeded well. The last year or two there has been a great scarcity of red raspberries, and the price has again advanced so that

this year the price opened at twenty cents per quart, and did not go lower than fifteen cents per quart even at Rochester, where red raspberries are largely grown. Cuthbert is a good vigorous grower and possesses vitality necessary for a popular variety. It yields bountifully of large and beautiful bright red berries, which are easily picked and command good prices. No fruit grower can afford to omit planting Cuthbert, and surely no person who has a garden should attempt to get along without red raspberries. Price: 50c per 10, \$1.25 per 100, \$10 per 1,000.

KANSAS BLACK RASPBERRY—Is of the largest size, vigorous, healthy and productive. It is a leading favorite at Green's fruit farm. When I was a boy I delighted to gather the wild black raspberries, but in those days I never met with anything like the Kansas. Fruit is large and excellent in quality. We have fruited it several seasons and find it an excellent variety.—C. A. Green. Price: 50c per 10, \$2 per 100, \$15 per 1,000.

RUBY RED RASPBERRY— A large and productive variety which we have been testing for several years. It originated on the Hudson River, N. Y., where it has proved to be a great favorite. This variety has become a great favorite. The fruit stands up well in the box and is very showy. In bush it is hardy and robust. Price, 50c for 10, \$2.50 per 100.

Chicago Heights, III., 4-16, '09
Dear Sirs:—Received my goods in excellent order and am very much pleased.

Respectfully yours, R. F. J.

PLUM FARMER BLACK RASPBERRY This very large and productive black raspberry has been thoroughly tested in western New York where it is a great favorite for market or home use. It is covered with a grayish bloom, like the bloom on a grape, which makes it very attractive in appearance. It ripens early and quickly. The fruit is of enormously large size, often measuring an inch in diameter. It sells at the highest price. Black raspberries are easily grown and produce fruit in abundance. The berries are delightful when made into pies or preserved. When a child I picked wild berries from the fence corners which my mother made into a jam for my special use, storing it in a broken-nosed china pot. Don't fail to plant the black raspberry. A fruit grower of national reputation says of this variety, "I feel very grateful to you that you intro-duced the Plum Farmer Raspberry. I bought 100 of you three years ago and have fruited it twice and have an acre of them to fruit this year. It is the greatest raspberry on earth." Price 50c per 10, \$2 per 100, \$16 per 1000.

columbian Raspberry is a purple variety much resembling Shaffer in growth of bush and fruit. A strong grower, unexcelled for productiveness and desirable for canning. At Green's Fruit Farm nine rows, 150 feet long, yielded 66 bushels. Color of berry purple, like Shaffer. Price, 50c per 10, \$2 per 100, \$18 per 1000.

CUMBERLAND— The largest of all Black-caps. A healthy, vigorous grower, throwing up stout, stocky well branched canes that produce immense crops of magnificent berries. Fruit very large, firm, quality about the same as Gregg, keeps and ships as well as any of the blacks. It is a profitable market variety. Mid-season. 10c; 10 for 50c, \$2 per 100, \$18 per 1,000.

RUBY RED RASPBERRY—This is an attractive name for an attractive berry. Think of eating rubies. We have tested this variety at Green's Fruit Farm and find it a valuable variety in every respect, both for market and home use. For a single ruby stone you might have to pay a thousand dollars but you can buy on hundred Ruby Red raspberry plants for \$2, and these plants will really do you better service than the more costly gem. Ruby raspberry originated in the Hudson River valley, N. Y. It has been growing there for many years and the fruit has been marketed in New York City. Do not fail to plant the Ruby.

Pawling, N. Y.

Gentlemen:— I am so pleased with the stock received from your house that I am compelled to write you about it. I planted them according to directions and everyone is growing. You will have my trade in the future and take pleasure in recommending your Company to all. Yours truly, J. D.

grower and most productive red currant. Season medium late.-

W. C. Barry says Diploma currant is large, solid and of good quality. It will be valuable for its size and Prof. H. E. Van Deman says:

Diploma Currant was exhibited by Jacob Moore at the Pan-Am., 1901. I was a judge of the first exhibit there, It was my duty and pleasure to examine carefully five baskets of this currant, sent at different dates for a month, some on branches as grown. Diploma currant is of attractive appearance, both clusters and berries being very large. The quality is good. It is a current of unusual promise.

Brown Brothers: We have tested Diploma current on the table with

sugar, and find it of delicious flavor. Considering its extra large size, productiveness and quality, it must become a valuable variety.

Price, 1 year old, 10c each, 80c per 10, 50 for \$3.75, 100 for \$7.50; 2 year old, 12c each, \$1 for 10, 50 for \$4.50, 100 for \$9...

RED CROSS CURRANT is sweet. It is natural to connect sourness with all red currants, since, as a rule, red currants are exceedingly acid, but Red Cross currant is an exception to the ordinary rule, being the sweetest currant ever produced. I know of no more appetizing or healthful dish than a dish of Red Cross currants at the table to be eaten the same as strawberries, or other sweet fruit. This qualification of sweetness and palatableness has not been properly emphasized. In making currant jellies, or in preparing currants in other ways, remember the Red Cross currant requires only half the sugar that many other currants require owing to its natural sweetness and fine flavor.

Prof. Maynard, of Amherst College, Mass., says Red Cross currant averages larger than Fay's Prolific, and is more vigorous. Jacob Moore, the originator, to whom we paid \$1250.00, says it is twice as large as Victoria, will yield twice as much as Cherry, and is of better quality than any of the older varieties. He says that the clusters are longer and that the size of the berry holds out larger to the end of cluster than Fay. C. M. Hooker says that Red Cross currant is larger than Fay's with longer fruit stems. He says the growth is remarkably vigorous, and the plants healthy and free from fungus. Green's receipts from one-half acre Red Cross in 1903, \$537.00; 1904, \$482.88.

Price of Red Cross, strong, 2-year-old bushes 60 cents per 10, \$5.00 per 100, \$45.00 per 1000. Strong, 2-year-old, No. 2 bushes, and strong 1-year-old bushes 50 cents per 10, \$4.00 per 100, \$35.00 per 1,000.

FAY'S PROLIFIC CURRANT—One of the largest currants, very productive. This has.long been a favorite. Price of Fay's: 60c per 10, \$5 per 100, \$45 per 1,000, for two-year-old plants. Second size twoyear plants, price 50c per 10, \$3.50 per 100.

CHAMPION BLACK CURRANT—This is the best of the largest black currants, so popular with our English friends and many others. Price, 2 years old, 60c per 10, \$4.50 per 100, \$40 per 10000.

WHITE GRAPE CUR-RANT—This is the best of all white currants and it

should be planted in every garden owing to the great beauty of the fruit as compared with the other red varieties. Price, 2 years, 60c per 10, \$5 per 100, \$40 per 1000.

GREENS

WILDER CURRANT— This is a new variety, very productive and valuable owing to its being the latest currant we have. It sells high when other currants have ripened and are sold. Price, 2 years

old, 60c per 10, \$5 per 100, \$45 per 1000. 1-year strong, \$4.25 per 100, \$40 per 1,000.

CHERRY CURRANT—This is the oldest large red currant. Not so vigorous as Red Cross. Price for two-year-old, 50c per 10, \$4 per 100.

VICTORIA— Red, vigorous productive, Price 2-year, 50c per 10, \$4 per 1.00

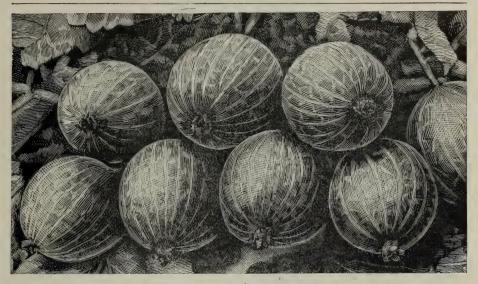

PERFECTION CURRANT—It is an upright, strong grower, thickly covered with clusters of fruit that reminds one of bunches of grapes, so large and perfect are they. New price 25c each, \$2 per 100.

Rebuck, Pa., Apr. 16, 1909.

GREEN'S NURSERY Co., ESTABLISHED 1870.

Gentlemen—The trees arrived yesterday in good condition. To say that we are pleased is putting it mildly; we were surprised at the

size of the trees for the price. H. C. H.

DOWNING GOOSEBERRY is the largest and best of all native American varieties; This valuable variety originated with Charles Downing, greatest of all pomologists. The value of Downing lies in its large size, fine quality, beautiful appearance, vigorous growth, and freedom from mildew. It is recommended as proof against mildew. Downing is free from spines, of a transparent color, tending to yellow; bush upright, keeping the fruit from the sand. Downing is enormously productive. Since plants of Downing can be produced in America, and plants of foreign varieties cannot, Downing plants can be sold at a lower price, which is another inducement for planting. An acre of Downing can be made to yield \$500. It is unsurpassed for canning. It is easily harvested by stripping the branches with a gloved hand, enabling the picker to gather many bushels in a day. The winnowing of leaves is done by an ordinary fanning mill, the same as beans. They can be shipped from Maine to California like marbles.—C. A. Green. Price of Downing Gooseberry: 2-year-old bushes, first-class, 12c each, \$1 per 10, \$8 per 100. 1-year strong, well rooted, 8c each, 70c per 10, \$6 per 100.

INDUSTRY GOOSEBERRY—This is a large red English variety which has succeeded better in this country than any other foreign variety. It is very productive and the fruit is of superior quality, selling well in the market and being desirable for family supply. It will succeed better when partially shaded by a fence or tree. Price: 20c each, \$1.75 per 10, for strong, 2-year-old bushes.

RED JACKET — An American seedling of large size, smooth, prolific and hardy, of best quality. Has been well tested over a wide extent of territory by the side of all the leading varieties, and so far the most free from mildew, both in

leaf and fruit, of them all. A wonderful cropper. Price of Red Jacket, 2 year, 15c each, \$1.25 per 10.

CHAUTAUQUA GOOSEBERRY—Very large, one of the best. Superior quality and very productive. Price: 20c each, \$1.75 per 10.

Lest You Forget

In addition to the 200,000 or more Apple, Peach, Cherry, Pear, and Quince trees that we have for sending by Freight and Express, we have 100,000 trees to send by mail, postpaid. An exceptionally large lot of Apple and Peach trees see last page of this catalog.

Strawberries grown in double hedge row, from one acre. Jacob Miller near Rochester, N. Y., gathered 5,650 quarts of strawberries notwithstanding a severe drought at the date of ripening.

CORSICAN, biggest berry on earth—This is C. A. Green's favorite strawberry. We have sent it out by the hundred thousands to every postoffice from the Atlantic to the Pacific oceans. It is a great strawberry for many reasons. First, it is the biggest berry; second, it is the brightest and best in color; third, it is a great yielder, and producer; fourth, and most important of all, the foliage is exceedingly vigorous and leathery, resisting fungus, drought, weed and even neglect of cultivation. Price of Corsican layer plants, 25c per 10, 75c per 100, \$6 per 1,000.

SENATOR DUNLAP—At Green's fruit farm it has no superior as an early variety. It is an all around, rough and ready producer, sturdy plant and heavy cropper of best quality berries. With clean, healthy foliage which has no tendency to rust. The berries are very large, roundish conical, regular, with slight neck. In color, they are glossy crimson, with the meat firm and solid, deep crimson throughout, and good in quality. Price of Senator Dunlap, layer plants, 25c per 10, 75c per 100, \$6 per 1,000.

GREEN'S PINEAPPLE FLAVORED STRAWBERRY—If you want a good flavored strawberry, one of the greatest yielders of large and beautiful fruit, plant Pineapple flavored strawberry. It was introduced by us. We are confident you will be surprised and pleased with this variety when you see it fruiting upon your place. Price of Green's Pineapple Flavored Strawberry, layer plants, 25c per 10, 75c per 100, \$6 per 1,000.

BRANDYWINE—A very late and firm berry, a good shipper; good canner; a good all around strawberry. This strawberry is being largely planted. In plant it is a luxuriant grower, healthy and very productive; blossom perfect, fruit large, of good form, bright red all over, and good quality. Price of Brandywine, layer plants, 25c per 10, 75c per 100, \$6 per 1,000.

CARDINAL (Imp)—The plant is perfect, large and luxuriant, and sends out many sturdy runners, which take root readily and make strong plants. The fruit is large, obtusely pointed. The color is a rich, brilliant red. Price 25c per 10, 75c per 100.

ADDITIONAL VARIETIES—Jessie, an old favorite. Glen Mary, the good medium early, and Gandy, the splendid late varieties. Price 25c per 10, 75c per 100.

ONE YEAR OLD APPLE TREES—In addition to the one year apple trees of mailing size (see mail pages) we have larger sized one year old apple trees, about five feet high, superior roots and all, of the following varieties. Baldwins, Ben Davis, Duchesse, Fameuse, Fall Pippin, King, McIntosh Red, Spy, Wagener, Wolf River and Yellow Transparent.

Speak quick if you want any part of these superior one year old apple trees. Price 15c each. First come first served. Remember that there is a famine in apple trees, but that we have the largest supply east of Chicago. 15 cents each.

ELDORADO BLACKBERRY— The hardiest and sweetest blackberry at Green's fruit farm this variety has never winter-killed or failed to produce a full crop of the finest fruit. The vines are very vigorous and hardy. Berries are very large, jet black, borne in large clusters, and ripen well together; are very sweet, melting, pleasing to the taste, have no hard core, and keep eight to ten days. C. A. GREEN

days. C. A. GREEN
"The Eldorado is the most promising of the newer hardy blackberries. It appears to be as hardy as Snyder, and is larger and of better quality."—Ohio Experiment Station.

"From last year's experience I can say that Eldorado is an immense producer, the berry ripens evenly and is very sweet, medium in size, second early. The yield was much greater than that of any other variety on our grounds last year."—Geo. C. Butz, Horticulturist State College, Pa. Price, 60 cents per 10, \$3 per 100, \$25 per 1,000.

SNYDER BLACKBERRY—This popular, hardy and profitable blackberry is known everywhere and planted largely. Where other varieties have entirely failed it proved itself entirely hardy. It is also grown in

SNYDER

localities where hardiness is not the first consideration because of its productiveness and general adaptability to all locations. It is the blackberry for every fruit grower desiring to make a start in blackberries, who has not the means to buy the highpriced varieties. Keep the soil rich with barnvard manure and wood ashes and no one will complain of the size of the Snyder. We have

grown it for twenty years and shall continue to plant it, as it gives a good picking where many other varieties have failed. This is the standard early sort for the North and Northwest, and is very popular. This was the first of the hardy kinds that made a sensation over the country. With good culture it is large enough to satisfy all. Like old dog Tray, it is ever faithful. The severest frost does not bite it. Season early; oblong oval in form; quality good. Price, 50 cents per 10, \$2 per 100, \$16 per 1,000.

GREEN'S NEW HARDY BLACK-BERRY—This blackkerry was discovered by our superintendant about ten years ago. We have since been fruiting it at Green's Fruit Farm and testing it. It has proved to be large, hardy, productive, vigorous and desirable in every way. If you want one of the largest hardy blackberries plant this. It is of good quality and tender to the core. Price of this new blackberry \$1 per 10, \$4 per 100.

LUCRETIA DEWBERRY—This is a very large trailing blackberry. It may be trained to a trellis or a stake. It bears abundantly. It propagates from tips the same as the black cap raspberry. Price 50c, per 10, \$2 per 100.

Mt. Rainer, Md., Apr. 12, 1909
Gentlemen—I am pleased to inform you that the shipment of trees arrived and were in good condition. Am delighted with the condition and quality of the trees. Have ordered trees this spring from different nurseries and regard it quite a recommendation for your stock. Very respectfully, J. D. H.

I take pride in my work during all these years, feeling that I have done my patrons good service. I have not only sold them trees etc., which were in good condition for growing, but have also sent out trees that were honestly labeled, each tree or plant being true to name.—C. A. GREEN.

AMERICAN SWEET CHESTNUT—It is a native of the Atlantic coast states, but has come into favor so much that it is planted North and in some of the Western states with success. It succeeds best if transplanted when young. We have several rows that bore a good crop when five years old, and we have no hesitancy in stating that it would be one of our best paying crops had we enough in bearing to make marketing necessary. Price of trees 4 fo 5 feet, 50c each, \$4 per 10, 3 to 4 feet, 30c each, \$2.50 per 10.

ENGLISH OR PERSIAN WALNUT—One of the largest, most delicious, meaty and desirable nuts. Not entirely hardy, but trees are bearing nuts in open ground at Rochester, N. Y. It is safe to plant it as far north as Philadelphia, Pa. Price 2 to 3 feet, 50c each.

JAPAN WALNUT, (Sieboldi)—Perfectly hardy, rapid grower, hardsome form, immense leaves; bears young and abundantly; one of the finest ornamental trees. Nuts produced in clusters; resembles Butternut in shape and quality; smaller with smooth and thinner shell. Worthy of extensive planting. Price, 5 to 6 feet, 30c, 4 feet 25c each.

Why? that is the question. Why should you buy Green's trees? First: Because of our national reputation of thirty years standing. Second: Because they are the best grown. Third: Because they are true to name. Fourth: They are hardy north grown trees. Fifth: They go safely packed. Sixth: They are honestly graded.

NUT TREES

Almost every farm contains land that should be planted to nut trees adapted to the soil. Probably no branch of tree cultivation pays larger profits.

HAZELNUT (Filbert)—This is the sort usually sold in the fruit stores. Price of Hazelnut, strong bushes, 25c each.

PECANS—Are hardier than English Walnuts, but will not succeed far north. This nut is very productive and delicious Price of Pecans, 3 to 4 foot trees, 35c each.

BLACK WALNUT—The common, well-known Black Walnut, the wood of which is most beautiful and valuable. It is very productive in nuts, which are much liked by many. Price of Black Walnut trees, 5 to 6 feet, 50c each, 4 to 5 feet, 35c each, 3 feet 20c each.

BUTTERNUT—A fine native tree producing a large longish nut, which is prized for its sweet, oily, nutritious kernel. Price of Butternut trees, 6 to 7 feet, 50c each, \$4 per 10, 5 to 6 feet, 35c each, \$3 per 10.

American Sweet Chestnut, 4 to 5 feet, 50c each, \$4 per 10, 3 to 4 feet, 30c each, \$2.50 per 10.

RUSSIAN MULBERRY—Hardy, rapid growing timber tree of value; useful in silk culture. Fruit abundant small and sweet; fruits on very small trees. The Russian Mulberry is the hardiest of all mulberries, and very valuable. The chickens are particularly fond of this fruit, which drops daily and is picked up quickly by them. The Russian Mulberry is a profitable tree to grow if only for chicken feed, since chickens are so fond of the fruit and thrive so well upon it. One large mulberry tree will furnish, perhaps, ten bushels or more, of mulberries. C. A. GREEN. Price of Russian Mulberry, 5 to 6 foot trees, well branched 35c each, \$3 per 10, 4 to 5 foot trees, 25c each, \$2.25 per 10.

GENESEE ASPARAGUS, (new)—A large, tender and delicious variety. A rapid grower and desirable in every respect. Offered by us now for the first time. Price: 30c per 10, \$1 per 100, \$9 per 1,000.

CONOVER'S COLOSSAL ASPARAGUS

—No vegetable that is so attractive to the delicate appetite of the epicure as the first delicious cuttings of this early asparagus. No vegetable is more beneficial as an appetizer to persons of sedentary habits. It is difficult to account for its cultivation being neglected. In country gardens it is rarely to be found, although so healthful and nutritious; yet everyone should have an asparagus bed. This good old variety is known everywhere; is of large size, rapid in growth and of good quality. Price: Large 2 year plants, 25c per 10, 75c per 100, \$5 per 1,000.

SAGE—(Holt's Mammoth)—Price, large bushy plants that have been grown in the nursery row, 10c each, 80c per 10, \$5 per 100. These plants by mail 12c each. Lighter plants at 50c per 10, \$4.00 per 100.

PALMETTO ASPARA-GUS—This is a large growing variety particularly delicious in quality. No home garden can be complete without it. Asparagus is one of the greatest garden delicacies, coming in at a season when there is no compet-

itor. When once planted this will continue to produce abundantly for life. The plants late in the season are objects of great beauty, and are worth growing for their beauty. Palmetto Asparagus is valuable for its healthgiving properties. It is also appetizing and is a rare delicacy for any table. Price of Palmetto Asparagus: Strong 2 year plants 25c per 10, 75c per 100, \$5 per 1,000. Asparagus plants will be sent by mail postpaid at 10 rates, and in 100, if 20 cents is added to the 100 price.

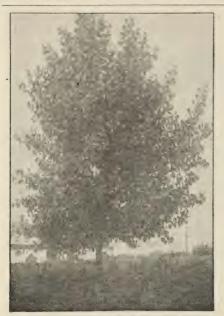

RHUBARB OR PIEPLANT.

Children playing hiding-go-seek behind Green's strong growing Rhubarb.

LINNAEUS RHUBARB—We have millions of well-rooted Rhubarb plants for sale. When spring opens the human system needs an acid. Fruits have not yet supplied these acids, therefore rhubarb, or pieplant, is the only source. Those who eat pieplant pie and sauce freely are greatly benefitted. Do you realize what excellent sauce can be made of rhubarb? Set 12 to 18 inches apart in the row. For ornament alone it pays to plant it. This is the best variety. Price of strong Pieplant roots, lower than ever before, 10c each, 80c per 10, \$5 per 100.

HORSE RADISH—Will stand a great deal of hardship and persist in soil year after year. Plant in deep, rich, cool soil. The yield will vary according to the soil and treatment. As high as ten tons have been secured from an acre. Price: Strong Sets, 25c per 10, 75c per 100, \$5 per 1,000.

CAROLINA POPLAR

THE NEW LARGE LEAVED CARO-LINA POPLAR takes front rank among the best of poplars. It is one of the most rapid growers among shade trees, frequently growing 8 feet during one season and thus making fine avenues in a few years. Its branches spread just enough to give it a symmetrical, commanding form of elegant appearance. It is very desirable at the roadside, in parks, along rivers and streams for the protection of the banks. It has advant-ages over other shade trees because it will grow in any kind of soil, swampy or muck, light or heavy. Its roots penetrate the hardest soil; it stands all hardships and thrives in places where others fail to live. It is easily started and gives shade in a short time. Don't forget the Carolina Poplar. For a quickly growing shade tree there is no tree which equals the Carolina Poplar. It is broadly pyramidal in form, very robust in growth, with large, glossy, deep green leaves. It stands the smoke and dust of the city streets better than any other shade tree. Very useful for planting as a screen to shut out unattractive buildings,

Price, 10 to 12 feet high, 30c each, \$2.75 per 10, \$20.00 per 100; 8 to 10 feet high, 25c each, \$2.00 per 10, \$15.00 per 100; 6 to 8 feet high, 20c each, \$1.75 per 10, \$12.00 per 100; 5 to 6 feet high, 15c each, \$1.25 per 10, \$10.00 per 100. We can supply your wants in ones, tens, hundreds, or thousands.

EUROPEAN BIRCH-6 feet, 35c each. DOUBLE FLOWERING PLUM-3 feet, 35c each.

LOMBARDY POPLAR

POPLAR, LOMBARDY—This is an old favorite. Well known and remarkable for its erect, rapid growth, and tall, spiral form. Indispensable in landscape gardening, to break the ordinary and monotonous outlines of most other trees. Price, 25c'each, \$2,25 per 10, \$18 per 100, 5 to 6 feet 20c each, \$1.75 per 10. Extra large, 8 to 10 feet trees, 35c each, \$3.00 per 10.

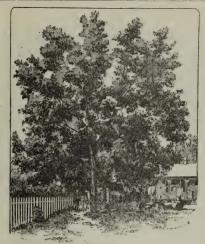

THE CUT-LEAVED WEEPING BIRCH—This noble tree is not only the most popular of weeping trees, but it is decidedly the best. Its

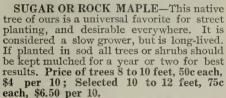

tall, slender, yet vigorous growth, graceful, drooping branches, silvery white bark, and delicately cut foliage, present a combination of attractive characteristics MEANS
rarely met with in a single tree. It thrives in any soil, and is very hardy, needs no protection. As single speci-

mens on the lawn or employed as avenue trees, they are very imposing and handsome. If one ornamental tree only, plant the Cut-Leaved Weeping Birch. Price, \$1.00 each.

PURPLE LEAF BEECH-This bloodleafed tree possesses all the qualifications of an ordinary beech, and in addition has beautiful red leaves which continue red throughout the season. Price, 3 to 4 feet, 75c each.

NORWAY MAPLE—This is one of the hardiest ornamental shade trees, and one of the most-beautiful. It makes more of a wide spreading tree than the sugar maple. A noble variety both in growth and form. Very popular for shade and ornament. This maple, with its

broad, showy leaves has many admirers, and nurserymen generally have quite a difficulty in supplying all demands. Price, 8 to 10 feet, 75c each, \$6.50 per 10; 6 to 8 feet, 60c each, \$5 per 10.

SILVER MAPLE—This is one of the best quick growing shade trees. It is beautifully ornamental if given room to develop, and is particularly useful on wide streets and avenues. Foliage is of an attractive silvery tinge. Succeeds well on all soils. Price, 6 to 8 feet, 50c each, \$4 per 10.

ASH LEAVED MAPLE or BOX ELDER—A very desirable tree for street planting. It stands transplanting well and grows rapidly. Price, 8 to 10 feet 50c each, \$4 per 10.

WIER'S CUT-LEAVED MAPLE—One of the most remarkable and beautiful trees, with beautiful cut foliage. Its growth is rapid, shoots slender and drooping, giving it a habit almost as graceful as cut-leaved Birch. Price, 6 to 8 feet, 50c each, \$4 per 10.

AMERICAN ELM—The most admired of all American trees. It is very attractive in any suitable location, is entirely hardy and easily transplanted. There are more Elm trees planted along our streets and highways than any other one variety. This on account of its dense green foliage, which spreads out from overhead, covering a suitable space of ground in proportion to the size of the tree, which makes it the finest shade tree in the world. We have a large stock of these handsome and most beautiful trees. Price, first-class trees, 8 to 10 feet high, 50c each, \$4 per 10; selected, 10 to 12 foot trees, 75c each, \$6.50 per 10.

P. PISSARDI, (Purple Leaved Plum)—The finest purple-leaved tree. The young branches are a very dark purple; the leaves, when young are

lustrous crimson, changing to a dark purple, and retain this. Price, first-class, 50c each, \$4 per 10.

WHITE FLOWERING HORSE CHESTNUT—In early spring these trees

are completely covered with beautiful flowers. We think there are but few who realize how beautiful are the flowers of the horse chestnut. When

autumn comes, the large red nuts cover the ground, to the delight of the children. Price, 5 to 6 feet, 50c each; \$4 per 10, 4 to 5 feet, 35c each, \$3 per 10.

Top cut shows grounds not planted, and lower cut when grounds are well planted.

DOUBLE FLOWERING THORN TREE—These beautiful flowering trees are unequaled for their fine effect on the lawn, forming a beautiful bouquet in tree form.

THORN, DOUBLE WHITE—Has small, double white flowers. A highly ornamental variety, on account of both foliage and flowers. Makes a very striking contrast when planted with the double scarlet. Strong trees. Price, 35c each.

PAUL'S DOUBLE SCARLET THORN APPLE— Flowers bright carmine red. Superior to any of its color. Strong trees.

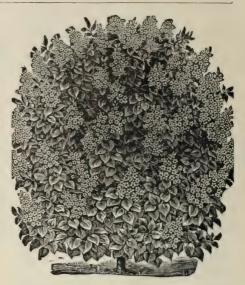

Price, 35c each.

it. Very desirable among the shrubbery when cut back. It also makes a handsome tree. Conspicuous at all seasons, but particularly in the winter on account of its yellow bark. Price, first-class, 4 to 5 feet, 35c each.

AMERICAN LINDEN OR BASS-WOOD—A rapid growing, large-sized, beautiful native tree, with very large leaves and fragrant flowers. Price 6 to 8 feet, 50c each.

PURPLE FRINGE OR SMOKE TREE, should be in all collections. Unlike any other flowering shrubs, blossoms resemble a cloud of smoke. Much admired and conspicuous in flower, and also pretty on account of its foliage in autumn. Price, strong, 25c.

HARDY CATALPA—One of the most showy flowering trees. The flowers have a pleasant fragrance, and a tree in bloom attracts the sense of smell and sight. It makes a beautiful object on the lawn and should be in everyone's dooryard. Price of trees, 6 to 8 feet, 35c each; \$3 per 10, 4 to 5 feet, 25c each, \$2.25 per 10.

PURPLE FRINGE OR SMOKE TREE

HARDY EVERGREENS

NORWAY SPRUCE HEDGE

NORWAY SPRUCE, the Leading, the Best Evergreen.—This is the most desirable evergreen for all purposes, and it is the most popular. It is extreemly hardy. It is desirable

NORWAY SHRUCE

anywhere where an evergreen is desired. It is of rapid growth and pyramidal form. When the tree reaches a height of 15 or 20 feet the branches assume a graceful, drooping habit, which is particularly pleasing. This splendid evergreen is not injured by heavy falls of snow, as the branches

bend with the weight and present a beautiful sight. It is also the best evergreen for hedging, more satisfactory in every way than any other hedge plant. An orchard or fruit garden enclosed with an evergreen hedge made of Norway Spruce will in cold states yield double the crop of sound fruit than if left to the bleak and cutting blasts of winter. Norway Spruce can be allowed to grow to any desired height, or can be kept trimmed down low.

Price, transplanted specimens, 2 to 3 feet, 25c each, \$2.25 per 10. 18 inch to 2 feet, 20c each \$1.75 per 10. Strong, 10 to 15 inch for hedges, 10c each, 80c per 10, \$5 per 100.

BALSAM FIR-Erect pyramidal ever green with dark green foliage. Grows rapidly, is very hardy and desirable. 35c each.

SCOTCH PINE-A fine robust, rapid growing tree. Especially good for single specimen planting, 35c each.

COLORADO BLUE SPRUCE—A hardy beautiful spruce with rich blue colored foliage. Our specimens are true blue and very nice. Price, 18 inch to 2 feet, \$2 each.

NORWAY SPRUCE HEDGE - The above cut herewith shows a hedge of Norway Spruce in Mount Hope Cemetery, Rochester, N. Y. with cut-leaved weeping birch trees in background. There is no

evergreen so largely planted as the Norway Spruce. It is indeed a tree possessed of great beauty at all seasons, particularly in winter when its branches are weighed down with snow. Price, for hedges, 10 to 15 inches, 10c each, 80c per 10, \$5 per 100.

FLOWERING VINES

JACKMANNI CLEMATIS-Flowers when fully expanded, are from 4 to 6 inches in diameter; intense violet purple, with a rich velvety appearance. Price of strong plants 35c each, \$3 per 10.

HENRYII CLEMATIS— A vigorous grower and free bloomer, producing its large, pure white flowers constantly during the summer and early antumn. Price 35c each, \$3 per 10.

TRUMPET FLOWER- A grand old favorite, hardy climbing plant, with large, trumpet shaped, scarlet blossoms in August. Fine for covering old tree stumps and verandas, or for growing as single specimens, (like illustration) if strong shoot is trained to a stake and headed back to form a head. It is very hardy and will thrive everywhere. Price, 25c, strong 2-year vines, \$2 per 10. AMPELOPSIS VEITCHII (Boston Ivy)—

This is one of the most beautiful ivies and the latest acquisition. It is a rapid grower and clings tenaciously to brick or stone walls, requiring no artificial fastening or training. A single vine may in time cover the entire side of a house or church. It is hardy and thrives almost everywhere. Price,

strong vines, 35c each, \$3 per 10.

HALLEANA (Hall's Japan Honey suckle)—An almost evergreen honeysuckle of the greatest value, being hardy and of strong growth. The flowers are fragrant, of a pure white changing to yellow, resembling a Cape Jasmine in odor, and produced in profusion from May to December. Price, strong plants, 25c each, \$2 per 10.

CLEMATIS PANICULATA—This beautiful Clematis fills a long felt want for a rapid growing, hardy, easy-to-transplant flowering vine. Its beauty is indescribable. It commences to grow very early in the spring and blooms profusely in the late fall. If you can plant only one vine, plant the Clematis Paniculata. A remarkably beautiful climbing plant. Flowers pure white, star-shaped, about one inch in diameter, borne in large clusters; will last several days as cut flowers, retaining their freshness and fragrance. Plant is a strong, quick grower, has broad, healthy foliage, seldom attacked by insects. A strong blooming plant. Price, 25c each, \$2 per 10.

CHINESE WISTARIA—One of the most elegant and rapid growing of all climbing plants; attains an immense size, growing at the rate of 15 to 20 feet in a season. Has long pendulous clusters of pale blue flowers in May and June and in autumn. Price 25c each, \$2 per 10.

VIRGINIA CREEPER (American Ivy)— The good hardy native American Ivy. Fine for trellises where a rapid growing vine is needed Price 25c each, \$2 per 10.

About Our Trees and Prices

Last Summer a friend decided to plant 1,000 Bartlett pear trees, largest size. A nursery tree agent called upon him urging him to give him the order, the price to be \$90 per 100. Our friend decided, first to write us for prices, and our prices were \$25 per 100 for large, gilt edged 3-year trees. We secured the order and the orchard is planted. \$650 difference per 1,000 trees in price.

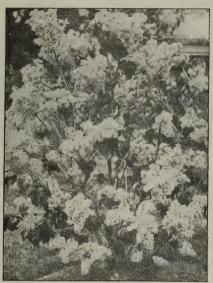

GOLDEN GLOW PLANT IN FULL BLOOM.

GOLDEN GLOW-This beautiful yellow blooming perennial plant was unknown to most people until a recent date. I know of no flowering plant that has attained such great popularity in so short a time. In order to be popular, a plant must be able to thrive in all localities without nursing and this is just what Golden Glow does. Like Phlox it stands out doors all winter. The foliage, which dies back every fall, springs up vigorously in the spring and grows to the height of 5 or 6 feet. It you do not wish the plants to grow so high, nip them off when they are a foot or two high, and they will branch out lower and be more desirable for certain localities. The blossoms appear in large numbers, hundreds of them on a single plant, and they succeed one another and remain long in bloom, giving the place an animated and brilliant appearance. Don't fail to plant Golden Glow. Price of strong plants, 5c each, 40c per 10 by mail or express.

DAHLIAS—A good assortment in colors. Price 25c each, \$2 per 10, by mail or by express.

When making out your order for border and shrubbery plants, don't overlook the new blue flower, the Anchusa Dropmore. It is very attractive.

Flowering Shrubs

OLD HOMESTEAD LILAC—There are no flowering plants more highly prized than this beautiful pink lilac. The Old Homestead Lilac is not claimed to be a new variety. It is a choice variety found in an old garden at Green's fruit farm. Price 25c each for strong well-rooted plants.

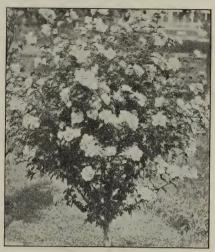

NEW HARDY LILACS— These are beautiful shrubs, indispensable in every collection, which we offer in double and single blossoms. In colors we have double and single white, double and single purple, double and single violet, pink and other colors. Price of New Hardy Lilac Bushes, imported from France, 35c each, \$3.25 per 10.

LILAC, PURPLE—The well-known variety, one of the best. A good grower; flowers and young wood fragrant; purple. Price, large size plants, 25c each.

LILAC, WHITE—A very desirable contrast to the purple; those who have one should have the other. Price, large size plants, 25c.

PURPLE LEAVED BARBERY—A beautiful shrub with violetpurple foliage; showy, small yellow flowers, and beautiful red berries in pendulous clusters. Price, strong bushes, 25c each.

ALTHEA (Rose of Sharon)—One of the most showy flowering shrubs; strong, erect growing, with large bell-shaped, double flowers of striking color, borne abundantly in August and September, when most other shrubs are out of bloom. We have pink and white, purple, white, red and pink blossoming, all of which are imported and grafted, blossoms being double and fine in every way. One good quality of the Altheas is that they keep their foliage fresh well into autumn, when the leaves of many other shrubs are dried up or blighted by fungus. They are very hardy, easily cultivated, and will bloom until their growth is cut short by frost. Grown in standard form they make good specimens, 8 to 10 feet high, resembling small flowering trees; planted thickly they are popular for flowering hedges, as they will endure considerable pruning. This should be given in winter. Our favorite is a variety producing an abundance of lovely pink and white blossoms. Price, heavily branched, well-rooted bushes, 2½ to 4 feet, 25c each.

View of Our Nurseries

JAPAN QUINCE, (Cydonia Japonica)—A popular and very valuable showy shrub. They are hardy and enduring, and form a beautiful bush or hedge. The prevailing and most desirable color, we think, is the deep crimson. Blossoms in early spring, and produces considerable fruit, which increases its value as an ornamental. Price, strong, 25c.

NOTE: Our shrubs are extra large and strong, will bloom the same year planted.

WEIGELA ROSEA— This is one of the most charming shrubs in cultivation; it cannot be too highly recommended; the flowers are large trumpet shaped and are borne in great profusion. We offer them in colors, red, pink and white. Price, strong plants, 25c. \$2 per 100.

DEUTZIA — Fine companion shrubs for the Spiræa. Good in every way; a delight to all. Hardy, easy to cultivate and sure bloomers. We grow them in large lots and make a specialty of the described varieties.

DEUTZIA CRENATA, Double flowered— A variety having double flowers, which

are white tinged with pink, and which are produced in racemes from 4 to 5 inches long in great profusion.

DEUTZIA,— Pride of Rochester, is a variety raised and introduced by Ellwanger & Barry, and blooms a week earlier than the other varieties. The flowers are large, double white, slightly tinged on the back of the petals with rose.

DEUTZIA WATERERII-White flowering, very attractive and should be included in every collection.

Prices of all the above varieties of Deutzias, large flowering bushes, 25c each, \$2 per 10.

Millbrooks, N. Y., Nov., 3, 1909
Dear Sir—Nursery stock received in excellent condition. I must say it was the biggest bargain I ever struck. In future my orders go to Green's Nursery Co.—F. H.

GOLDEN-LEAFED ELDER—The best of all the colored shrubs. A plant of this bush in a bed, or a border, or on the lawn, is a conspicuous feature, the foliage being as yellow as gold. Price strong plants, 25c each.

FORSYTHIA VIRIDISSIMA (Golden Bell)—From China. A fine, hardy shrub of spreading habits and straggling growth. It comes into bloom early, and flowers are of a bright orange-yellow. Price, large, 25c.

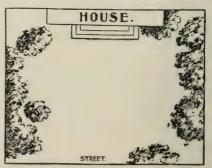

MOCK ORANGE—Flowers, white deliciously perfumed. Derives its name owing to flowers resembling orange blossoms; a delightful substitute for that noble flower. Price 25c each.

WHITE FRINGE— A popular and much admired shrub of moderate growth and rounded form, with large, dark green, glossy leaves, and long drooping panicles of beautiful white fringe-like flowers. Price, strong plants, 25c each.

DWARF BARBERY, B. Thunburgii—Very attractive, neat and dense in growth, yet graceful because of its drooping branches. The yellow flowers are followed by scarlet fruits borne in dense profusion on the long stems and clinging through most of the winter; the leaves color to scarlet and gold in autumn. Price 25c each, for hedge \$9 per 50.

TREE CRANBERRY
This is an attractive and profitable fruit. Hardy as a rock and most desirable, combining the ornamental with the useful. Its beautiful red fruit clings to the branches in winter. Price large bushes, 25c each.

"THE RIGHT WAY IS TO LEAVE OPEN SPACES."

(Paniculata HARDY HYDRANGEA Grandiflora)—We urge our friends to plant the Hydrangea. There is nothing that will gratify you, who love beautiful objects more. Plant it for the following reasons: It is hardy, enduring the severest winters out doors without protection. It is easily transplanted, not one in a thousand dying; it never fails to blossom the first year planted; no matter how small the plant, it immediately buds out in great profusion of flowers, many of them as large as the head of a full grown child. It is thus attractive immediately after planting, gaining in beauty for ten or twenty years if properly pruned. It remains in blossom the longest of any flower, a single blossom remaining in beauty for a month. When the specimens first open they are a greenish white, later they turn to a pure white, and still later to a delicate pink. The Hydrangea should be cut back at least one-half of each season's growth in order to get the largest specimens. If the branches of the bush are cut down nearly to the ground, the most beautiful specimens will be produced the same season. It can be grown in tree form, To get the best results, make the soil rich, it will grow anywhere and on any soil. There is no plant on earth that I can recommend with greater confidence than the Hydrangea. It can be mailed safely anywhere.—C. A. GREEN. Price 25c each, extra large, 35c each.

SPIRAEA

SPIRAEA—Elegant low shrubs of easy culture, very hardy and indispensable in every shrubbery. Very satisfactory for single or clumping effect and planted more largely than any other flowering shrub. We make a specialty of the following varieties and grow them by the thousand. 25c each.

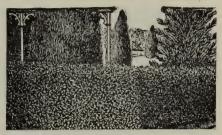

and grow them by the thousand. 25c each.

Spiraea Callosa Alba—A white flowering variety of dwarf habit; very fine, 25c each.

Spiraea Callosa Rosea—Has large panicles of deep rosy blossoms; grows freely and blooms nearly all summer; fine, 25c each.

Spiraea Van Houttei—This is undoubtedly the best of the spiræas. The accompanying cut is a fair one, and shows it in blossom.

The blossoms are white. 25c each,

CALIFORNIA PRIVET FOR HEDG-ING—The greatest of all hardy hedge plants. The City of Rochester, N. Y. is one of the most beautiful in the world. On almost every lot California Privet hedges are planted to divide one lot from another. This Privet hedge is also planted in front of most houses adjacent to the street. The Privet hedge is easily kept at any height desired. In many cases the hedge is not allowed to grow over 2 feet high; in other cases the hedge may grow as high as 4 to 6 feet. It has no thorns, does not sucker from the roots and is not objectionable in any way. This hedge holds its foliage nearly all winter. It is almost an evergreen.

C. A. Green says, do not fail to plant California Privet hedge plants. We have a large supply of splendid Privet ready for making a beautiful hedge and offer it at the very low price as below. It has a beautiful white blossom, like a white lilac. It is not so rank a grower as locust or spruce, and does not spread so wide or occupy so much ground as many hedges. Therefore it is popular in city and village planted on the streets or between small building lots.

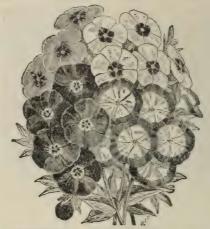

50,000 Home Grown Privet, Price, heavy, 2 year, well branched, \$3.50 per 100, \$30 per 1,000. Extra heavy transplanted, 10c each, 80c per 10, \$5 per 100.

YUCCA FILAMENTOSA-I know of no flowering plant more showy. It looks like the Century plant, and is mistaken by many for the Century plant. It is a gorgeous grower and endures the most severe winters without protection. It blossoms year after year, for a lifetime, as shown in the above illustration, and its blossoms look like white lily blossoms. They are pure white, and remain a long time in bloom. Sometimes the blossom stalk is thrown up to the height of 6 feet, making one of the most showy and conspicuous flowering plants in existence. The Yucca is a rare plant, is easily transplanted and should be in every selection. Price of strong plants, 25c each, \$2 per 10.

Holyoke, Mass., May 12, 1909 Gentlemen:—The trees and bushes have kind attention.

PERENNIAL PHLOX-Finest autumn Plant roots of the Phlox in fall or spring and those roots will continue to send up flower shoots each spring for twenty years. The bunch of roots however, will after four or five years become so large as to be improved by dividing the cluster of roots, making, perhaps, a dozen transplants from one cluster, planting these out in a new bed, or a new row. Nothing transplants easier and there is no flower grown which can be produced in abundance with so little trouble. I plant the Phlox in a row along the border of the roadway, in a bed made up of several rows, or in a round bed on the lawn, or in single clumps here and there among the flower beds, or in the shrubbery. Every one who visits Mr. Green's place admires these beautiful plants of Phlox. It is hardy and succeeds everywhere, and on all soils. We offer three colors: pink, white and red. Price of strong plants, 15c each, \$1.25 per 10, \$12 per 100.

BEAUTIFUL STRIPED GRASS-Fine for borders or clumps. Price 10c per set 90c per 10.

Millersburg, Pa., April 15, 1909 Gentlemen: Some of my neighbors thaught that stock ordered from your firm would not be very good on account of its cheapness. On opening up the box they were greatly surprised on seeing the size and arrived, and I find that they are an excellent quality of the trees sent. You will have my collection. I thank you very much for your orders in the future and I hope theirs as well. Very respectfully, W. H. S.

Green's Special Collection of Flowering Shrubs, Etc.

4 Althea (3 Colors) 3 Spiraea (3 Colors) 2 Deutzia (2 Colors) 1 Purple Berberry 1 Golden Elder 1 Snowball 1 Yucca 3 Golden Glow

All extra strong ready for immediate effect. Catalogue price \$3.50, ALL FOR \$2.40

A FIELD OF PAEONIES

PAEONIES—A giant among flowers. This old and popular flower has again come into favor. It is certainly worthy of a revival, since it is one of the most showy and attractive of flowering plants. Of late years great improvement has been made in varieties of Pæonies. This flower has ever been a favorite but it is more popular now than it ever was owing to the fact that new varieties of almost all colors have been introduced, and many of the varieties have marked peculiarities, being as fragrant and beautiful as the rose. Price and colors of Paeonies—Red, pink and pink and white, best varieties, strong roots, (that will flower the coming summer) 25c each, \$2 per 10. Price of White Paeonies, strong roots, 35c each, \$3 per 10.

ANCUHSA DROPMORE (The Heavenly-Blue-Flower)—We have ever been slow in offering new flowering plants, but we offer this in full confidence that it is one that our patrons will want. This is one of the very choicest hardy border plants, "The Heavenly-Blue-Flower," as it has been aptly called. Its flowers are a pure blue in color, like the lovely Gentian. It is very hardy, growing from 4 to 6 feet with good culture. It is fully covered with pure blue flowers an inch in diameter, which, in the evening, is of a surpassing beauty and loveliness. It flowers in May, lasting about two months in bloom. We offer strong blooming plants. Price 35c each, \$3 per 10, by mail or express.

GLADIOLUS— Do not fail to plant from 12 to 100 bulbs. This is one of the best for summer flowering. It is a flower anyone can grow. Price of bulbs, fine mixed colors, 15c per 6, 20c per 10, \$1.10 per 100.

OSTRICH PLUME, The New Ornamental Grass (Eulalia) (Gracillima Univitata).— Is nearly as beautiful as ostrich plumes when in blossom. Plumes will keep for months or years, drying like feathers. Valuable for decoration for mantle piece, side board or piano. This is one of the most attractive ornaments to any garden or lawn, and one of the most easily secured and least expensive. There is nothing in all nature more graceful than the stalks of this beautiful ornament. C. A. Green introduces this with fine effect in various places on his Rochester place. A single plant in a flower bed, or on a lawn is an object which will attract attention. It is most attractive planted in a row bordering the drive, or to separate one part of the yard from another. or among flowers and shrubs. Is easily transplanted and grows rapidly. One plant at the end of the year's growth may be divided to make twelve or more strong plants. Price, strong plants, 10c each, 80c per 10.

What to Plant for a Hedge

In the course of the Spring season many of our patrons write us, "What shall I plant for a hedge?" Our answer is if you are inclined towards an evergreen hedge, plant Arbor Vitae or Norway Spruce. If you desire some other kind of hedge; Purple Berberry, Thunbergii Berberry, Japan Quince, California Privet, Spiræas, Althæas, Live-for-Ever Roses. Any of these will please you and all are listed in these pages.

We can also supply you with Osage Orange, Honey Locust. Write for price on these last named. If you need something to hide buildings plant Carolina Poplar.

ROSES. Hardy Varieties How to Grow Them

How easily one can succeed with the Rose. It will grow almost anywhere and under all circumstances. Although it has its likes and dislikes, it will not fail to blossom anywhere. It is easily transplanted and commences to blossom a few weeks after planting. It is true that they give best results if planted in a rich loamy soil. We protect ours during the winter by bending the bushes to the earth and cover up the whole bush with strawy litter or covering the bush with evergreens. Pruning should not be overlooked. Roses will blossom from June to November with management. For an abundance of early blossoms prune the bush immediately spring opens, and for late flowering the bush should be severely pruned after the June flowering.

Two Year Bushes Ready for Immediate Effect—The bushes we send by express or freight are two year old (mostly on their own roots) and bushes that will blossom the first season. The bushes we send by mail are one year strong or two year nice and ninetynine out of every hundred should blossom the first season planted.

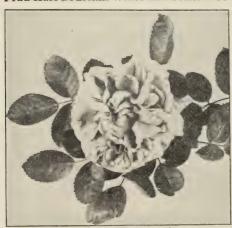

The Climbing Roses, with their mass of blossoms, are beautiful indeed for trellises, fences, etc. No garden should be without two or three.

If You Have Not Roses in your garden, you have overlooked the queen of flowers, one which will afford you more pleasure than any other named flower.

Roses by Mail—Please note that we make a specialty of small size hardy out door roses by mail, postpaid, at prices offered. These roses are cut back so as to facilitate the mailing, but are cut back only as they should be for best results when planting.

Out Door Grown Roses—Every rose bush that we send out has been grown out doors and is hardy. They are all dormant; do not expect roses from us with the foliage on like small indoor roses received from florists. These hardy roses as grown by us are the ones to plant in the flower bed or beside the house or along the walks. They need no petting and do not need taking up and storing in cellar in winter.

Prices of Roses, general variety, (see following pages.) Each 25c. Special varieties, Frau Karl Druschki White and Soliel d'Or Yellow, each 35c.

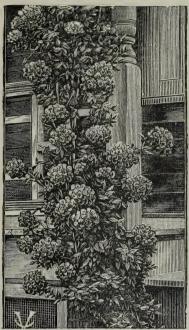

The Beautiful Soliel d' Or

The New Yellow Rose

SOLIEL D'OR—Yellow is the one desirable color that has been lacking in hardy Roses. This new Rose is the result of a cross between Persian Yellow and Antoine Ducher. It is a fine, strong grower, producing superb, conical-shaped buds varying from gold and orange-yellow to reddish gold shaded with nasturtium-red. The flower is very full, large and globular, the petals in the center being well incurved. It is a robust, vigorous grower, with brownish wood and beautiful bright green foliage. It was awarded first prize at the Paris Exposition and numerous gold medals throughout Europe. Price, strong No. 1 bushes, 35c each \$3 per 10.

We have 20,000 Rose bushes to send by mail in addition to the heavy bushes that we send by express and freight.

HARDY ROSES

CRIMSON RAMBLER—A climbing rose of unusual attractions. Very hardy, having withstood to degrees below zero without covering. Vigorous in growth, having grown 8 to 10 feet in a season. Produces a profusion of blossoms, having been known to produce 300 blossoms on one shoot. The Crimson Rambler is especially adapted for covering trellises. Its clustered form, its brilliancy, the abundance of its bloom, and the great length of time the flowers remain on the plant without falling or losing their brilliancy, are qualities which make this rose an assured favorite. Price of bushes, 2 years, 25c each, \$2 per 10, \$18 per 100.

DOROTHY PERKINS—A most valuable Pink Rambler Rose. Of a most beautiful shell-pink color. In hardiness, nothing more could be desired. Flowers are very double, of large size, usually two inches across and borne in loose clusters. The petals are very prettily rolled back and crinkled; the buds are remarkably handsome, being pointed in shape and of just right size for the buttonhole. Price 25c each, \$2 per 10.

COQUETTE DES BLANCHES— Pure white, of fine form. Free bloomer and a very fine rose for late blossoms.

ANNE DE DIESBACH— Carmine, a beautiful shade; very large. A superior garden sort; fragrant; one of the hardiest. Price, 25c.

FRAU KARL DRUSCHKI (Snow Queen)—The finest white Hybrid Perpetual Rose, with large, full flowers of splendid form. It is marvelous in its beauty in half open bud and in the pure white of the full opened bloom. In a bed of a dozen plants there is seldom a day during the summer when blooms cannot be cut, and during the spring and fall it blooms in profusion. It is the ideal rose for cemetery planting both North and South. It holds its foliage well and is healthy and vigorous and in hardiness it equals any of the Hybrid Perpetuals. Strong No. 1 bushes, 35c each, \$3 per 10.

COQUETTE DES ALPS—White, slightly shaded with carmine; strong grower and a great favorite. This variety is very valuable; it continues to give a profusion of blossoms for weeks after general varieties have finished. Price 25c each, \$2 per 10.

BABY RAMBLER—A dwarf (Bush) form of Crimson Rambler, and furthermore, Ever-blooming. Will bloom continuously throughout the summer if planted out-of-doors. Has the same bright crimson color as the climbing Crimson Rambler, and blooms in clusters of 20 to 40 flowers at one time on plants of fair size. "Baby Rambler" is one of the best Roses for bedding.

I point with pride to the high grade and to the splendid roots of our trees, plants and vines this year. Bountiful Fall rains have enabled us to dig them with perfect roots.

MAGNA CHARTA—A general favorite, prized on account of its strong, upright growth, and bright, healthy foliage, as well as for its magnificent bloom. The color is beautiful pink, suffused with carmine. This rose is one of Chas. A. Green's favorites. It is surprising the wealth of blossoms produced by one bush, and a bed or a row of this fine, hardy rose is a delight for an unusually long season. We recommend it as the best large pink rose. Price, 25c each.

PAUL NEYRON—On our grounds gives us more blossoms than any other variety, except Coquette des Alps. If we could only plant one rose bush, Paul Neyron would be our choice. It is very strong in growth and prolific in blossom.

Chas. A. Green plants MAGNA CHARTA Roses as single specimens, in beds, and in rows. It is a grand hardy rose, more prolific in blossom than any other rose.

CLIO, vig.—Flowers large, in clusters, of fine globular form, flesh-color shaded in the center with rosy pink; growth vigorous; handsome foliage. One of the best roses.

PRAIRIE QUEEN (Climber)— Bright rose, very large and free bloomer; extra fine.

ADDITIONAL ROSES— John Keynes, Pink Rambler, Ulrich Brunner, White Rambler, Persian Yellow. Price 25c each.

We offer strong, hardy roses by mail, (see mail pages.)

Price of roses, (unless otherwise priced) 25c each \$2 per 10.

SNOWBALL (Virburnum)—A well-known favorite shrub, with globular clusters of white flowers the latter part of May. This good old early and sure flowering shrub is planted perhaps more extensively than any other. It is found in every collection in the gardens of the rich as well as the poor. We have a fine lot of plants, strong 2 to 3 feet. Price 25c each, \$2 per 10.

LIVE-FOREVER-ROSE— A bug-proof, hardy Rose. If you have tried growing roses and failed, try once more, for we have discovered a rose which lives long and is proof against insects and diseases. It is as easy to grow this variery as lilacs, corn or sunflowers.

I recommend this rose to all, especially to those who have not been able to succeed with roses. Plant it in large beds and you will have a display of bloom that will attract attention and admiration. Plant it in the form of a hedge-row and you will have something attractive and unique. We have rows 500 feet in length that have been set from two to ten years, which in bloom time

attract hundreds of rose lovers. You can train it low or high as you desire. Price of strong well-rooted 2-year bushes, 15c each, 10 for \$1.25, 1-year bushes, or mailing size, suitable for hedges, 10c each, 90c per 10, 100 for \$7.50.

LADY GAY-A seedling of Crimson Rambler which it closely resembles in habit of bloom and vigor of growth. The flowers (in large loose clusters) are of a delicate cherry-pink color, fading to soft tinted white. The effect of a plant in full bloom with the combination of soft white flowers, cherrypink buds and deep green of the foliage is indeed charming. It is perfectly hardy and

unsurpassed for climbing work.

WHITE RAMBLER—Resembles Crimson Rambler in foliage and habit; flowers pure

GENERAL JACQUEMINOT—The leading rose. Deep, brilliant shaded crimson, with large petals, globular with high center. A well known favorite; one of the best and planted by all who plant roses.

LA FRANCE—Delicate silvery rose; very

LA FRANCE—Deficate silvery rose; very large, full flowers, with a faint tea odor.

MAD. J. LAING—Soft, delicate pink.

MADAME PLANTIER— Pure white, above medium size; full. Produced in great abundance early in the season. Foliage, rather small, seven leaflets. One of the best white roses for hedges and for massing in

MOSS ROSES- Red, pink and white. Much admired for the beautiful, moss-like covering of the buds.

BALTIMORE BELLE (Climber)—Pale blush, large, very double; one of the best climbers.

Green's New Rose Collection

Live-Forever Rose Grown as Hedge, \$7.50 per 100 for Hedge Bushes

PLANTS AND TREES BY MAIL

(Safe Delivery Guaranteed)

No gift Raspberry plant with mail orders.

WE HAVE 25,000 Apple, 20,000 Peach, 5,000 Standard Pears, 50,000 Currants, 50,000 Raspberry, 25,000 Blackberry, 25,000 Grape Vines, 100,000 Strawberry Plants, 5,000 Black Walnut, 2,000 Catalpa, 20,000 Roses for our mail order patrons this season. We also have many other trees and plants, see following pages. Do not order Trees sent by mail not listed in these pages.

WE HAVE THOUSANDS of well pleased patrons who have received through the

mail, postage paid by Green, trees and plants from Green's nurseries.

IN THE PACIFIC COAST STATES and in every distant state where trees can be grown will be found orchards and gardens planted with trees from our nurseries that were

received by mail.

WE DO NOT OFFER as large an assortment by mail as we do by express and freight.

OUR SPECIALTY this spring is APPLE TREES and PEACH TREES. Note the list

on this page—varieties known to be good—good for home or commercial planting.

A SATISFACTORY FEATURE of the trees and plants by mail is that the order can be filled with safety at any time during winter or spring. Must you plant in January or February send your order and specify this when sending it, and the order will be filled accordingly (except perhaps strawberries, which go later.)

WRITE US for prices if you need apples and other trees offered here by the hundred, or

if there is anything that is not plain.

25,000 APPLE TREES BY MAIL

Grown especially for our mail trade, fine one-year-oldtrees. The varieties we offer are:-American Blush, Winter Banana, Baldwin, Ben Davis, Bismarck, Gano, Green's Baldwin, Jonathan, M. B. Twig, McIntosh Red, Newtown Pippin (Albemarle), Rome Beauty, Stayman's Winesap, Tolman Sweet, Transcendent Crab, Wagener, Wealthy, Wismer's Dessert, York Imperial. Descriptions of these found in preceding pages.

Prices (postpaid) for all varieties except Banana and McIntosh, 15c each, \$1.40 per 10, \$13 per 100 Price of Banana and McIntosh 18c each, \$1.70 per 10.

These thrifty, well-rooted one-year-old apple trees have been popular with our patrons for many years, especially with those who live far away or who are not near railroads or express offices who desire the trees to come by mail without any charge to the buyer for safe delivery at their door.

20,000 PEACH TREES BY MAIL

Superior, Clean stock. Not stunted trees, but first-class June budded, excellent in every way for long shipment and successful planting.

have mailed these in years past to valleys of the western mountains, and other distant sections, where their success has led to the planting of thousands of acres of trees in regions where it was not known that peaches could be grown.

The varieties of peach trees we offer by mail are:-Chair's Choice, Carman, Champion, Crawford Late, Elberta, Greensboro. Prices of Peach Trees, 12c each, \$1.10 per 10, \$10 per 100.

ELBERTA is the Money Making Variety.

It is a yellow peach, large to very large in size, the peach that dealers like to handle, a variety that never lacks a buyer. It is a very valuable, handsome peach, desirable for home or market. For further description of Elberta and of other varieties named in these mail pages, see foregoing pages of this catalog. If we were about to plant 100 of these mail size peach trees we would select 50 Elberta, 15 Late Crawford, 15 Champion, 10 Greensboro, 5 Chair's Choice, and 5 Carman. Price for the 100 is \$10 delivered at your door.

These mailing size Peach Trees will come into bearing the same year as the large sized trees.

5,000 STANDARD PEARS BY MAIL

Strong, well rooted trees, 2 to 3 feet. The varieties of pear trees that we offer to send by mail are the leading ones. The list is as follows:—Anjou, Bartlett, Clapp's Favorite, Duchesse, Flemish Beauty, Koonce, Kieffer, Lawrence Winter, Seckel and Vermont Beauty.

We make a specialty of BARTLETT PEAR for mailing. It is the favorite pear of all pears for home and market.

Price of Pears (postpaid by Green), 20c each, \$1.80 per 10.

Cherries: 2 Green's Tartarian, 1 Napoleon I Diploma New Red Currant, I Red Cross Currant, I Syracuse New Red Raspberry. ALL FOR \$2.47 Catalog Price, \$3.47

Those in Distant States many miles from a railroad should avail themselves of these mail pages. Please remember that we do not recommend you who live in nearby States to order by mail, the railroad will serve you better, as you would get larger stock for the same amount of money. The stock we send by mail in every case will be nice, well rooted and first-class of its size, and all sent postpaid guaranteed safe delivery.

California, Dec. 1, '08 The trees and berry bushes arrived in perfect condition, and we are perfectly satisfied Yours truly F. A. G. with them.

ROSE BUSHES BY MAIL

OSES-The roses we offer are hardy, outdoor grown. We offer a varied assortment.
Red, Pink, White. We
especially recommend
Lady Gay, Mrs. J.
Laing, Gen. Jacq., Coq., de Alps, Crimson Rambler, Magna Charta, Dorothy Perkins.

Price of roses named above 25c each. Soliel d'or, the New Yellow rose, 40c each, postpaid by Green.

GLADIOLUS BULBS—This is one of the best of summer flowering bulbs.

flower anyone can grow. By making successive plantings the flowering season may be continued much longer than by planting the bulbs all at the same time. There is no limit to the range of color—pink, scarlet, yellow, crimson, white and

a host of other colors. Gladiolus Bulbs, mixed colors, Price, 15c per 6, 25c per 10, \$1.10 per 100.

GOLDEN GLOW- This beautiful and vigorous blooming perennial, which thrives in all localities. The blossoms appear in large numbers on single plants. Price of Golden Glow, strong plants, 5c each, 40c

PERENNIAL PHLOX-I have for several years been propagating selections of Phlox. These brighten and beautify my grounds each year. You plant the roots and it blooms forever after, forming large clumps which can be separated and replanted-C. A. GREEN. Price of Perennial Phlox, assorted colors, 10c each, 75c per 10.

LIVE FOR EVER ROSE-Hardy and Bug Proof. See last outside cover page for description and illustration and price for bushes by express or freight. This beats the world for a rose that needs no nursing yet blooms marvelously every year. Special Price, 1-year, strong, 10c each, 90c per 10.

Cut shows Live Forever Rose grown as a hedge.

Weight less than thirty pounds; can go by express or freight at very small cost. Just think of it! A Parer, Corer and Slicer with a Fruit Evaporator, all for only \$5.50.

YOU CANNOT AFFORD TO LOSE THIS OFFER

Dear Sir—I found the Cook Stove Drier which I bought of you last fall just as represented and I think the world of it; it really paid for itself last fall. I dried 400 pounds of dried apples with it and it did its work perfectly.

Yours respectfully,

CHARLES B. REES

FRUIT, WINE AND JELLY PRESS

Three in one. Cleanest a n d best. The only one that separates juice, seeds and skins at one operation. For ma k in g wines, jellies and fruit butters from grapes, strawberries, rasp-

berries, blackberries, gooseberries, currants, quinces, pineapples, etc. The dryness of the pulp may be regulated by thumb screw at the outlet. Weight only 15 lbs.

Special Price, complete, \$3.95.

The Best Spray Pumps are sold by Green's Nursery Co. Send for Green's complete implement catalogue containing everything for planting, spraying and marketing fruit. We save you money.

HOW TO ORDER.—We employ no agents. This Catalogue is our only salesman. Fill out this Order Sheet with the items you want to buy, enclosing Postal Money Order, or Bank Draft on New York, and mail all to us in enclosed envelope. By this method you save half the money you would have to pay agents for trees. We have filled orders in this way for twenty years, and are well known all through the country. You can learn of our responsibility through any commercial agency, bank or banker, or of the postmaster at Bochester, N. Y. We pack and ship all Winter to Southern States from trees stored in our large cellars. Our Regular Spring Shipping Season opens from April first. State positively how we are to ship, whether by Freight, Express, or Mail. If by Freight or Express, give name of R. B. station and your post-office.

Green's Poultry Department

Cockerels, Pullets, and Eggs for Hatching for Sale

Barred Plymouth Rocks—This breed is as solid as its name and is often called the "Farmer's Friend," the "All 'Round Fowl," the "Old Reliable." It is the bird for business, and deemed by many the best fowl for farm and home raising. It is not only a good layer, but is quick to develop for the early market. As a far sighted farmer once said to us, "When you kill one you've got something."

PRICE OF BIRDS OF ALL BREEDS—Cockerels \$2.50, \$3.00 and \$5.00 each; Pullets, \$2.00, \$2.50 and \$3.00 each; Trios, \$6.00, \$8.00 \$10.00. Whateve price you pay I will see that you get good value.

C. A. GREEN, Prest, Green's Nursery Co.

Single Comb Brown Leghorns—The acknow-ledged queen of the practical egg laying breeds is the Leghorn, when judged by the standard of the greatest number of marketable eggs produced at least cost. Not only are the hens persistent layers, but they are extremely active foragers and waste no time in setting. Like a good milch cow they put little fat upon their bones, but devote all surplus nourishment to steady production. They eat less than the heavy breeds, but whatever they consume is put to good purpose.

SINGLE COMB BROWN LEGHORNS

PRICE OF EGGS FOR HATCHING FOR BOTH BREEDS—From good breeding pens, \$1.00 per 13; from our best breeding pens, \$2.00 per 13. While we do not guarantee the fertility of our eggs we are willing to replace all settings from which the purchasers receive less than six chicks, at half the price paid.

America's Greatest Fruit Magazine,

"Green's Fruit Grower"

Are you a subscriber to Green's Fruit grower, which I have been publishing for 30 years? If not, when sending in your order for trees add 25 cents to the sum to be sent us and I will accept it in full payment for one year's subscription to Green's Fruit Grower, which is just half the regular price. If you are already a subscriber, for this 25 cents we will send the Fruit Grower for one year to any friend or relative you may desire.

CHAS. A. GREEN

GREEN'S NURSERY COMPANY

Rochester, N. Y.

Price of I year bushes: 10 cents each, 80 Cents per 10, \$750 per hundred.

Price of 2 year bushes: 12 cents each, \$100 per 10, \$900 per hundred.
